1 Scope

This document specifies repeatability standard deviation and reproducibility standard deviation for results obtained from test methods carried out according to the following standards:

- EN 12720:2009+A1:2013, *Furniture — Assessment of surface resistance to cold liquids*,
- EN 12721:2009+A1:2013, *Furniture — Assessment of surface resistance to wet heat*,
- EN 12722:2009+A1:2013, *Furniture — Assessment of surface resistance to dry heat*,
- EN 15185:2011, *Furniture — Assessment of the surface resistance to abrasion*,
- EN 15186:2012, *Furniture — Assessment of the surface resistance to scratching*,

in order to provide the accuracy of results.

The above standards deal with all rigid furniture surfaces regardless of materials and they do not apply to leather and textile surfaces.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3.1 precision

closeness of agreement between independent test results obtained under stipulated conditions

Note 1 to entry: Precision depends only on the distribution of random errors and does not relate to the true value or the specified value.

¹⁾ This document is impacted by the corrigendum ISO 5725-1:1994/COR 1:1998, *Accuracy (trueness and precision) of measurement methods and results — Part 1: General principles and definitions Technical corrigendum 1*.

²⁾ This document is impacted by the corrigendum ISO 5725-2:1994/COR 1:2002, *Accuracy (trueness and precision) of measurement methods and results — Part 2: Basic method for the determination of repeatability and reproducibility of a standard measurement method Technical corrigendum 1*.
