# Digital information interchange in the insurance industry — Transfer of electronic documents

---

Part 2: Implementation of EN 17419-1 in Open API 3.0 specification

## National foreword

This Published Document is the UK implementation of CEN/TR 17419-2:2023. It supersedes PD CEN/TR 17419-2:2021, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee IST/47/-/3, eBusiness.

A list of organizations represented on this committee can be obtained on request to its committee manager.

## European foreword

This document (CEN/TR 17419-2:2023) has been prepared by Technical Committee CEN/TC 445 “Digital Information Interchange in the Insurance Industry”, the secretariat of which is held by DIN.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users’ national standards bodies. A complete listing of these bodies can be found on the CEN website.

This document supersedes CEN/TR 17419-2:2021.

According to the CEN/CENELEC Internal Regulations, the national standards organisations of the following countries are bound to announce this Technical Specification: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

## Introduction

The EN 17419-1:2020, *Digital Information Interchange in the Insurance Industry — Transfer of electronic documents — Part 1: Process and Data Model*, defines the transfer of electronic documents between stakeholders in the insurance industry (for example between insurers and intermediaries):

- the semantic process for the transfer of documents that may be transferred as an attached file; and
- a limited number of meta data describing the document.

The definitions are described in the standard on a semantic level with process and data models in a syntax-neutral format independent from its representation in a concrete implementation syntax.

This document exemplifies a concrete implementation of the EN 17419-1:2020 as an OpenAPI specification. The OpenAPI syntax is published by the OpenAPI Initiative, an open-source collaboration project of the Linux Foundation, and is a specification for machine-readable interface files for describing, producing, consuming, and visualizing RESTful web services.

This document is a guide for organizations that want to implement the EN 17419-1:2020. Even more, the specification contained in this document can be directly implemented with OpenAPI tools that can automatically generate code, documentation and test cases.

All stakeholders that want to implement EN 17419-1:2020 will benefit from the implementation guide described in this document due to:

- Uniform implementation of EN 17419-1:2020 across the industry, based on a common technology.
- Avoidance of divergent implementations, thus avoiding incompatible digital interfaces between the stakeholders.
- Implementation for RESTful web services, a common micro-service technology.
- Specification in OpenAPI syntax, a common basis for the definition of RESTful web services.
- Automatic generation of code, documentation and test cases, based on OpenAPI tools.
- Facilitated implementation will accelerate the application of EN 17419-1:2020.
- Facilitated implementation will accelerate the usage of EN 17419 by SMEs.

## 1 Scope

This document specifies a concrete REST webservice API description of the processes and data (see EN 17419-1:2020 for more information) as an OpenAPI definition specified by the OpenAPI specification.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 17419-1:2020, *Digital Information Interchange in the Insurance Industry - Transfer of electronic documents - Part 1: Process and Data Model*

## 3 Terms, definitions and abbreviations

### 3.1 Terms and Definitions

For the purposes of this document, the terms and definitions given in EN 17419-1:2020 apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <https://www.electropedia.org/>
- ISO Online browsing platform: available at <https://www.iso.org/obp>

### 3.2 Abbreviations

|      |                                    |
|------|------------------------------------|
| API  | Application Programming Interfaces |
| JSON | JavaScript Object Notation         |
| OAS  | OpenAPI Specification              |
| OAI  | OpenAPI Initiative                 |
| REST | Representational State Transfer    |
| SOAP | Simple Object Access Protocol      |
| XML  | Extensible Markup Language         |
| YAML | Yet Another Markup Language        |
|      | YAML Ain't Markup Language         |

## 4 Technical basis for OpenAPI definition

### 4.1 Cloud services and REST

In a more and more communication based and service orientated IT infrastructure, the ease of use, implementation, operation and maintenance of IT-services as main economic success factors determine the type of underlying architectures and tools to be used. Cloud enabling of services as one strategic aspect allows to reduce the time to market of products while focussing on core competence – the business aspects - of IT activities.
