

BSI Standards Publication

Space product assurance — Components reliability data sources and their use

National foreword

This Published Document is the UK implementation of CEN/TR 17602-30-08:2021.

The UK participation in its preparation was entrusted to Technical Committee ACE/68, Space systems and operations.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

TECHNICAL REPORT

CEN/TR 17602-30-08

RAPPORT TECHNIQUE

TECHNISCHER BERICHT

December 2021

ICS 49.140

English version

Space product assurance - Components reliability data sources and their use

Assurance produit des projets spatiaux - Sources de
données de fiabilité composants et leur utilisation

Raumfahrtproduktsicherheit - Datenquellen zur
Bauteilezuverlässigkeit und deren Anwendung

This Technical Report was approved by CEN on 22 November 2021. It has been drawn up by the Technical Committee CEN/CLC/JTC 5.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom

Rue de la Science 23, B-1040 Brussels**

Table of contents

| | |
|-------------------------------------------------------------------------|-----------|
| European Foreword | 4 |
| 1 Scope | 5 |
| 2 References | 6 |
| 3 Terms, definitions and abbreviated terms | 7 |
| 3.1 Terms from other documents..... | 7 |
| 3.2 Abbreviated terms..... | 7 |
| 4 Selection of reliability data and methods | 8 |
| 4.1 Introduction..... | 8 |
| 4.2 Selection process | 8 |
| 4.3 Description of data..... | 11 |
| 4.3.1 Handbook reliability data..... | 11 |
| 4.3.2 Manufacturer or user data..... | 11 |
| 4.4 Selection criteria for input sources..... | 11 |
| 4.4.1 Reliability handbooks | 11 |
| 4.4.2 Manufacturer or user data..... | 12 |
| 4.5 Justification for choice | 14 |
| 4.6 Instructions for use..... | 15 |
| 4.6.1 Reliability handbooks | 15 |
| 4.6.2 Manufacturer or user data..... | 15 |
| 4.7 Considerations for reliability prediction for mechanical parts..... | 16 |
| 4.7.1 General..... | 16 |
| 4.7.2 Part failure data analysis..... | 17 |
| 4.7.3 Empirical reliability relationships..... | 17 |
| 4.7.4 Analysis of the stress-strength | 17 |
| 4.7.5 Handbook data..... | 18 |
| 4.8 Documentation | 18 |
| Annex A Potential data sources | 19 |
| A.1 Introduction..... | 19 |
| A.2 EEE parts | 19 |

European Foreword

This document (CEN/TR 17602-30-08:2021) has been prepared by Technical Committee CEN/CLC/JTC 5 "Space", the secretariat of which is held by DIN.

It is highlighted that this technical report does not contain any requirement but only collection of data or descriptions and guidelines about how to organize and perform the work in support of EN 16602-30.

This Technical report (CEN/TR 17602-30-08:2021) originates from ECSS-Q-HB-30-08A.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

This document has been developed to cover specifically space systems and has therefore precedence over any TR covering the same scope but with a wider domain of applicability (e.g.: aerospace).

1

Scope

This handbook identifies data sources and respective methods that can be used for reliability prediction of components. It proposes suitable data sources and an application matrix for component families.
