English Version

**Service excellence - Creating outstanding customer
 experiences through service excellence**

Excellence de service - Exigences et lignes directrices
 pour l'excellence de service en vue de créer
 l'enchantement du client

Service Excellence - Schaffung von herausragenden
 Kundenerlebnissen durch Service Excellence

This Technical Specification (CEN/TS) was approved by CEN on 7 October 2015 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Introduction

The competitive world in which customer expectations and behaviour evolve has changed. Today, globalization, new technologies, education, information, transparency and the increased choice of products and services allow customers more freedom of choice. Every purchase and customer contact is a moment of truth. Existing and prospective customers are influenced by the opinions of other customers, for example by their reviews on the internet. These reviews can have a disproportionate impact on an organization's reputation and its success or failure.

Organizations often say they put the customer at the centre of their business. However, in competitive markets it is essential to manage the whole organization around the customer and the experience offered. Organizations who know and do this will flourish. It is no longer enough for organizations to deliver the basic services and products expected by customers. To be successful and to stay ahead of competitors, it is essential to delight customers by providing outstanding experiences. This is the objective of service excellence.

This Technical Specification describes the principles, elements and sub-elements for creating outstanding customer experiences. The basic foundations of implementing service excellence are the two lower levels of the service excellence pyramid (see Figure 1). These are described in standards such as EN ISO 9001 and ISO 10002. This document deals with the upper levels which are:

- individual service (Level 3);
- surprising service (Level 4).

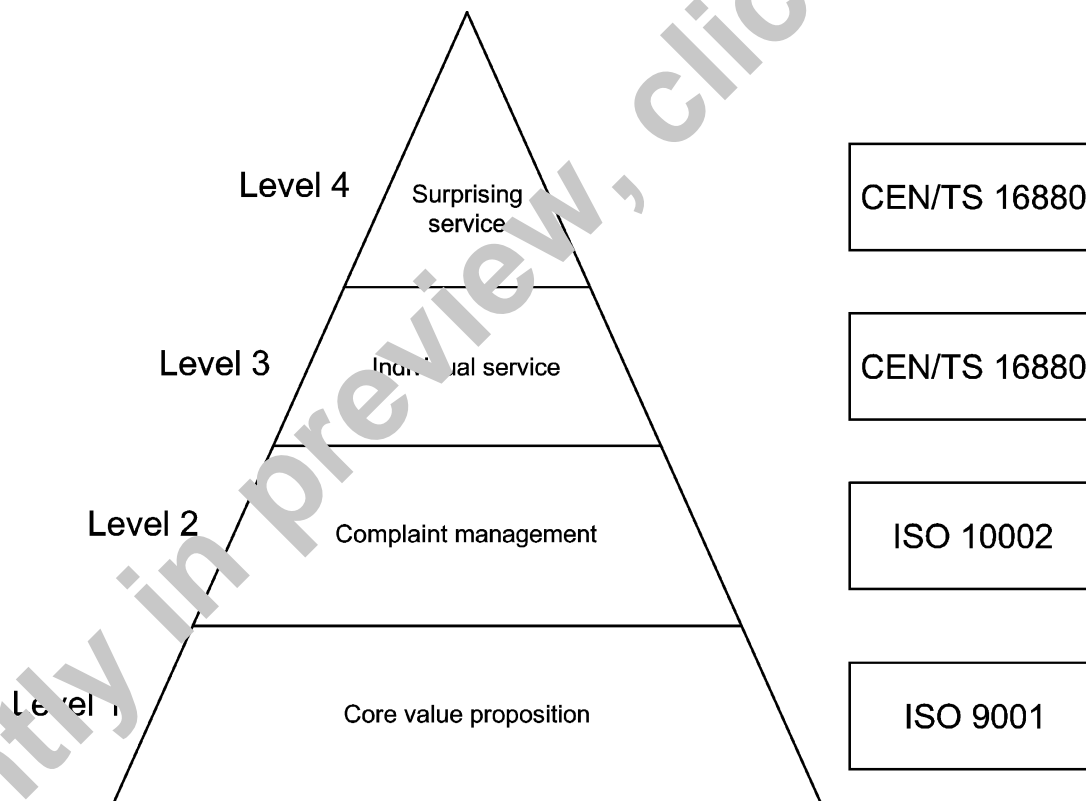

Figure 1 — Service excellence pyramid¹⁾

1) Adapted from DIN SPEC 77224.

These two levels create an emotional connection with the customer and lead to customer delight. The impact for the business is a strong brand image and attractiveness to new and existing customers as well as competitive differentiation.

Individual service (Level 3) is perceived by customers as warm, genuine, personalized and tailor-made. The customer experiences an emotional reaction by feeling valued.

Surprising service (Level 4) is tailor-made and leads to emotions of surprise and joy. It is delivered by exceeding customer expectations. This can be achieved by delivering unexpected outstanding customer experiences.

1 Scope

This Technical Specification sets out guidance for the implementation of service excellence in order to create outstanding customer experiences, exceed customer expectations and achieve customer delight. It does not focus on the provision of basic customer service which organizations should already have in place.

This document applies to all organizations delivering services, such as commercial organizations, public services and not-for-profit organizations.

2 Normative references

None.

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1

co-creation

active involvement of stakeholders in service design, delivery and innovation.

3.2

customer

person or organization that could or does receive a product or service intended for, or required by, the person or organization

EXAMPLE Consumer, client, end-user, patient, beneficiary and purchaser.

Note 1 to entry: A customer can be internal or external to the organization. The output of each internal process is the input for the next process. The next process is the internal customer of the preceding process.

3.3

customer delight

emotions of pleasure and surprise experienced by the customer derived from either an intense feeling of being valued or by expectations being exceeded

3.4

customer experience

perception by a customer about their interaction with an organization, its products or services

Note 1 to entry: An interaction is related to a customer journey or the whole relationship with an organization, its products or services.

3.5

customer journey

complete sum of experiences of a customer when engaging with an organization, its products or services

employee engagement

extent to which employees feel enthusiastic about their job, are committed to the organization and put discretionary effort into their work

Note 1 to entry: Engaged employees are motivated to go the extra mile for customers and the organization.
