

CGA C-3—2019

STANDARD FOR WELDING ON
THIN-WALLED STEEL CYLINDERS

EIGHTH EDITION

CGA
Compressed Gas Association

The Standard For Safety Since 1913

PLEASE NOTE:

The information contained in this document was obtained from sources believed to be reliable and is based on technical information and experience currently available from members of the Compressed Gas Association, Inc. and others. However, the Association or its members, jointly or severally, make no guarantee of the results and assume no liability or responsibility in connection with the information or suggestions herein contained. Moreover, it should not be assumed that every acceptable commodity grade, test or safety procedure or method, precaution, equipment or device is contained within, or that abnormal or unusual circumstances may not warrant or suggest further requirements or additional procedure.

This document is subject to periodic review, and users are cautioned to obtain the latest edition. The Association invites comments and suggestions for consideration. In connection with such review, any such comments or suggestions will be fully reviewed by the Association after giving the party, upon request, a reasonable opportunity to be heard. Proposed changes may be submitted via the Internet at our website, www.cganet.com.

This document should not be confused with federal, state, provincial, or municipal specifications or regulations; insurance requirements; or national safety codes. While the Association recommends reference to or use of this document by government agencies and others, this document is purely voluntary and not binding unless adopted by reference in regulations.

A listing of all publications, audiovisual programs, safety and technical bulletins, and safety posters is available via the Internet at our website at www.cganet.com. For more information contact CGA. Phone: 703-788-2700, ext. 799. E-mail: customerservice@cganet.com.

Work Item 17-008
Cylinder Specifications Committee

NOTE—Technical changes from the previous edition are underlined.

NOTE—Appendix D (Normative) is a requirement.

NOTE—Appendices A, B, C, and E (Informative) are for information only.

EIGHTH EDITION: 2019
SEVENTH EDITION: 2005
SIXTH EDITION: 2003
FIFTH EDITION: 2000

Contents	Page
1 Introduction.....	1
2 Scope	1
2.1 Procedure qualification.....	1
2.2 Operator qualification	1
2.3 Container production acceptance.....	1
2.4 Radiographic inspection	1
3 Definitions.....	1
4 Procedure qualification	2
4.1 Applicability.....	2
4.2 Procedure specification	2
4.3 Welding procedures.....	2
4.4 Base material.....	2
4.5 Positions of welds.....	2
4.6 Type, number, and method of preparation of test specimens.....	3
4.7 Methods of testing specimens and required test results	3
4.8 Records	3
4.9 Essential variables	3
5 Operator qualification	5
5.1 Applicability.....	5
5.2 Welding procedures.....	5
5.3 Base material.....	5
5.4 Positions of welds.....	5
5.5 Type, number, and method of preparation of test specimens.....	5
5.6 Methods of testing specimens and acceptable test results	6
5.7 Retests	6
5.8 Period of effectiveness	6
5.9 Records	7
5.10 Essential variables	7
6 Container production acceptance.....	7
6.1 Location of details for required tests.....	7
6.2 Production lots.....	7
6.3 Radiographic examination.....	7
7 Radiographic inspection.....	7
7.1 Applicability.....	7
7.2 Technician qualifications	8
7.3 Preparation.....	8
7.4 Terminology.....	8
7.5 Darkroom facilities.....	8
7.6 Film viewing facilities	8
7.7 Film processing	9
7.8 Parameters.....	9
7.9 Film identification and inspection data.....	10
7.10 Selection of technique	11
7.11 Limits of acceptability	11
7.12 Retests	12
7.13 Retention of radiographs	12
8 Container repair—applicability	12

9	Test methods.....	12
9.1	Positions of welds.....	12
9.2	Tension test (transverse to weld)	13
9.3	Flattening test (on cylindrical section)	14
9.4	Flattening test (on sphere).....	15
9.5	Root-break test.....	15
9.6	Macro-etch test.....	16
9.7	Guided-bend test.....	16
10	Assignment of electrodes.....	20
11	References	21

Tables

Table 1	—Composition limits for material groupings.....	3
Table 2	—Procedure qualification test specimens	4
Table 3	—Operator qualification test specimens	6
Table 4	—Assignment of electrodes and welding rods for procedures and operator qualification	21

Figures

Figure 1	—Example of a penetrometer	9
Figure 2	—Suggested format for radiograph documentation	10
Figure 3	—Position of welds	13
Figure 4	—Specimen for tension test.....	14
Figure 5	—Specimen for guided-bend test	17
Figure 6	—Standard guided-bend test jig	18
Figure 7	—Alternate guided-bend test jig.....	19
Figure 8	—Illustrated methods for alternate guided-bend test.....	20

Appendices

Appendix A	—Recommended form for procedure qualification record (Informative).....	22
Appendix B	—Recommended form of welding procedure specification (Informative)	23
Appendix C	—Recommended form for manufacturer's record of welder or welding operator qualification tests (Informative)	24
Appendix D	—Dimensional tolerances (Normative).....	25
Appendix E	—Typical weld joints (Informative).....	26
