PLEASE NOTE:

The information contained in this document was obtained from sources believed to be reliable and is based on technical information and experience currently available from members of the Compressed Gas Association, Inc. and others. However, the Association or its members, jointly or severally, make no guarantee of the results and assume no liability or responsibility in connection with the information or suggestions herein contained. Moreover, it should not be assumed that every acceptable commodity grade, test or safety procedure or method, precaution, equipment or device is contained within, or that abnormal or unusual circumstances may not warrant or suggest further requirements or additional procedure.

This document is subject to periodic review, and users are cautioned to obtain the latest edition. The Association invites comments and suggestions for consideration. In connection with such review, any such comments or suggestions will be fully reviewed by the Association after giving the party, upon request, a reasonable opportunity to be heard. Proposed changes may be submitted via the Internet at our web site, www.cganet.com.

This document should not be confused with federal, state, provincial, or municipal specifications or regulations; insurance requirements; or national safety codes. While the Association recommends reference to or use of this document by government agencies and others, this document is purely voluntary and not binding unless adopted by reference in regulations.

A listing of all publications, audiovisual programs, safety and technical bulletins, and safety posters is available via the Internet at our website at www.cganet.com. For more information contact CGA. Phone: 703-788-2700, ext. 799. E-mail: customerservice@cganet.com.

1 Scope

This publication describes the specification requirements for nitrous oxide manufactured by various processes. All references should be to the current edition of CGA G-8.2, *Commodity Specification for Nitrous Oxide*.

WARNING: For safety reasons, do not permit nitrous oxide to come in contact with oil, grease, asphalt, or any substance that has been determined to be incompatible with oxidizers. Use equipment cleaned for oxidizer service in accordance with the current edition of CGA G-4.1, *Cleaning Equipment for Oxygen Service* [1].¹

2 Definitions

2.1 Publication terminology

2.1.1 Shall

Indicates that the procedure is mandatory. It is used wherever the criterion for conformance to a specific recommendation allows no deviation.

2.1.2 Should

Indicates that a procedure is recommended.

2.1.3 May

Indicates that the procedure is optional.

2.1.4 Will

Is used only to indicate the future, not a degree of requirement.

2.1.5 Can

Indicates a possibility or ability.

2.2 Technical definitions

2.2.1 Container

Portable compressed gas cylinders and liquid containers made in accordance with Title 49 of the U.S. *Code of Federal Regulations* (49 CFR) Parts 100-199; Transport Canada's (TC) *Transportation of Dangerous Goods Regulations*; or *ASME Boiler & Pressure Vessel Code*, Section VIII, Division 1 [2, 3, 4].

2.2.2 Lot

An amount of a product produced during a period of time indicated by a specific code or some other unique identifying characteristic.

2.2.3 Parts per millicentimeter

ppm (v/v) = parts per milliliter by volume.

2.2.4 Percent

Percent (v/v) = parts per hundred by volume.

2.2.5 Water dew point

Water, measured in ppm (v/v) or as dew point in degrees Fahrenheit, is expressed at 1 atmosphere absolute (101 kPa abs). To convert to other units, see Table 3.

3 Classification

3.1 Types

Nitrous oxide in containers at ambient temperatures is in both gaseous and liquid states. Liquid nitrous oxide at subambient temperatures in bulk containers is in both gaseous and liquid states.
