

## CONTENTS

|  |    |
|--|----|
| Summary .....  | vi |
| Résumé .....   | vi |
| Zusammenfassung .....  | vi |
| 1 Introduction .....   | 1  |
| 2 Scope .....  | 2  |
| 3 Terms and definitions .....  | 2  |
| 4 Use cases and their requirements for image enhancement for CDOs .....                          | 5  |
| 4.1 Use cases .....  | 5  |
| 4.2 Requirements .....   | 6  |
| 4.2.1 Discrimination .....   | 6  |
| 4.2.2 Colour-name information .....  | 6  |
| 4.2.3 Preservation of original colour .....  | 7  |
| 4.2.4 Preference .....   | 7  |
| 5 Enhancement techniques .....   | 8  |
| 5.1 Classification .....   | 8  |
| 5.2 Recolouring .....  | 8  |
| 5.2.1 An interactive app for colour-deficient observers .....                                    | 8  |
| 5.2.2 Adaptive colour visualization for dichromats using a customized hierarchical palette ..... | 11 |
| 5.2.3 Image-enhancement methods based on the p/c safe colour palette .....                       | 13 |
| 5.2.4 Exact compensation of colour weaknesses with discrimination-threshold matchings .....      | 14 |
| 5.2.5 Real-time temporal-coherent colour contrast enhancement for dichromats .....               | 17 |
| 5.2.6 Image enhancement based on hue rotation (HR) and hue-blending (HB) methods .....           | 18 |
| 5.2.7 An efficient naturalness-preserving image-recolouring method for dichromats .....          | 20 |
| 5.3 Edge enhancement .....   | 22 |
| 5.3.1 Border enhancement based on unsharp masking .....  | 22 |
| 5.4 Pattern superposition .....  | 24 |
| 5.4.1 Hatching method by angular lines .....   | 24 |
| 5.4.2 Using patterns to encode colour information for CDOs .....                                 | 25 |
| 5.5 Comparison of enhancement techniques .....   | 26 |
| 5.5.1 General comparison .....   | 26 |
| 5.5.2 Performance-based comparison .....   | 27 |
| 6 Test methods for enhancement techniques .....  | 28 |
| 6.1 General .....  | 28 |
| 6.2 Test images .....  | 28 |
| 6.2.1 Natural image .....  | 29 |
| 6.2.2 Scientific visualization images .....  | 30 |
| 6.2.3 Document images .....  | 31 |
| 6.3 Evaluation methods .....   | 32 |
| 6.3.1 Visual test by CDO .....   | 32 |
| 6.3.2 Visual test by CNO using a simulator .....   | 33 |
| 6.3.3 Evaluation using behavioural visual search .....   | 35 |
| 6.3.4 Behavioural test by CDO using eye tracker .....  | 38 |
| 7 Conclusion and future work .....   | 43 |

|   |    |
|---|----|
| Annex A Assessment of CDOs .....  | 45 |
| A.1 Colour-vision test .....  | 45 |
| A.1.1 General test .....  | 45 |
| A.1.2 Computer-based test .....   | 46 |
| A.2 Gene test .....   | 47 |
| Annex B CDO groups .....  | 49 |
| Annex C Colour difference for CDOs based on uniform colour space .....  | 50 |
| C.1 Introduction .....  | 50 |
| C.2 Conventional method based on a trichromatic colour-difference formula .....   | 50 |
| C.3 D-CIELAB: Colour-difference metric for dichromatic observers .....  | 50 |
| C.4 Two-stage model formulation for dichromatic colour perception .....   | 50 |
| C.5 L#M#S#: Quasi-uniform colour space based on LMS-cone responses .....  | 51 |
| C.6 $l_{cp}$ and $s_{cp}$ : Approximately uniform chromaticity diagrams for the protanomalous and the deuteranomalous ..... | 52 |
| Annex D Side-by-side list of selected colour-deficiency terms and their definitions ..                                      | 53 |
| References .....  | 54 |
