Legal Notice for Standards

Canadian Standards Association (CSA) standards are developed through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA is a private not-for-profit company that publishes voluntary standards and related documents. CSA has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA and the users of this document (whether it be in printed or electronic form), CSA is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA's and/or others' intellectual property and may give rise to a right in CSA and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

1 Scope 1

2 Reference publications 2

3 Definitions 4

4 General 10

- 4.1 Application 10
- 4.2 Approval of appliances, accessories, components, equipment, and materials 11
- 4.3 Responsibilities of the installer 11
- 4.4 Training and quality of labour 11
- 4.5 Suitability of use 12
- 4.6 Electrical connections and components 12
- 4.7 Hazardous locations 12
- 4.8 Smoking 12
- 4.9 Isolation of safety devices 13
- 4.10 Leak detection 13
- 4.11 Appliance clearances to combustibile material 13
- 4.12 Accessibility 13
- 4.13 Appliance ductwork connections 13
- 4.14 Combined heating systems 13
- 4.15 Appliances protected by automatic fire-extinguishing systems 14
- 4.16 Control of appliances with self-energized pilots 14
- 4.17 Defective heat exchangers 14
- 4.18 High-altitude installations 14
- 4.19 Protection of appliances from physical damage 15

5 General requirements for propane and propane equipment 15

- 5.1 Odorization 15
- 5.2 Container filling 15
- 5.3 Protection of containers and equipment 16
- 5.4 Pressure regulation 17
- 5.5 Line relief valves 17
- 5.6 Hydrostatic relief valves 17
- 5.7 Vent lines and discharge lines from regulators and line relief valves 17
- 5.8 Termination of vent and discharge lines from regulators, line relief valves, and hydrostatic relief valves 18
- 5.9 Piping, tubing, hose, and fittings 18

6 Cylinder systems 18

- 6.1 Requirements for cylinders 18
- 6.2 Liquid level gauges on cylinders 20
- 6.3 Automatic regulating equipment 20
- 6.4 Purging and filling of cylinders 21

|--------|--|----|
| 6.5 | Storage and use of cylinders at locations other than filling plants | 22 |
| 6.5.1 | General | 22 |
| 6.5.2 | Cylinders stored outdoors for commercial or industrial use or sale | 23 |
| 6.5.3 | Cylinders at construction sites | 25 |
| 6.5.4 | Cylinders supplying propane for welding, cutting, and preheating processes | 26 |
| 6.5.5 | Cylinders at commercial and industrial sites to supply propane for industrial trucks and ice maintenance equipment | 26 |
| 6.5.6 | Storage of non-refillable cylinders in retail outlets and their warehouses (mercantile occupancies) | 27 |
| 6.5.7 | Cylinders at sites where propane is supplied for cleaning and polishing equipment | 29 |
| 6.5.8 | Storage of cylinders located in special rooms or buildings | 30 |
| 6.5.9 | Cylinders supplying propane to portable food-serving carts located indoors | 30 |
| 6.5.10 | Construction of special cylinder storage rooms or buildings | 30 |
| 6.6 | Transportation of cylinders | 31 |
| 6.7 | Installation of cylinders | 32 |
| 6.8 | Rooftop installation of cylinder systems | 33 |
| 6.9 | Diking and grading | 33 |

7 Tank systems, filling plants, and refill centres 33

| | | |
|--------|--|----|
| 7.1 | General | 33 |
| 7.2 | Relief valves | 35 |
| 7.3 | Emergency shut-off valves | 35 |
| 7.4 | Excess-flow and back check valves | 36 |
| 7.5 | Pressure gauges on tanks | 37 |
| 7.6 | Liquid-level gauges on tanks | 37 |
| 7.7 | Filling of tanks | 38 |
| 7.8 | Installation of underground tanks | 40 |
| 7.9 | Discharge from tank relief valves | 42 |
| 7.10 | Location of consumer tanks | 42 |
| 7.11 | Tank supports | 43 |
| 7.12 | Filling plants and refill centres | 44 |
| 7.13 | Electrical equipment at filling plants | 44 |
| 7.14 | Storage of containers at filling plants | 44 |
| 7.15 | Fencing of filling plants | 46 |
| 7.16 | Location of tanks at filling plants and container refill centres | 46 |
| 7.17 | Container filling locations with provisions for container storage | 46 |
| 7.18 | Filling plants served by rail | 46 |
| 7.19 | Container refill centres | 48 |
| 7.19.1 | General | 48 |
| 7.19.2 | Fencing of container refill centres | 49 |
| 7.19.3 | Ventilated cabinets or enclosures | 49 |
| 7.19.4 | Protection against vehicular traffic | 49 |
| 7.19.5 | Electrical equipment | 50 |
| 7.20 | Dispensing devices | 50 |
| 7.21 | Movement of tanks not designed for transportation or delivery of propane | 55 |

8 Tank trucks, tank trailers, and cargo liners 55

| | | |
|-----|--|----|
| 8.1 | General | 55 |
| 8.2 | Tank equipment on tank trucks, tank trailers, and cargo liners | 55 |
| 8.3 | Pumps and compressors on tank trucks and cargo liners | 56 |
| 8.4 | Piping, tubing, hose, and fittings on tank trucks, tank trailers, and cargo liners | 56 |
| 8.5 | Electrical equipment and lighting on tank trucks, tank trailers, and cargo liners | 56 |
| 8.6 | Braking systems and chock blocks | 56 |
| 8.7 | Exhaust systems | 57 |

- 8.8 Engine fuel 57
- 8.9 Fire extinguishers 57
- 8.10 Tank truck and cargo liner lettering 57
- 8.11 Towing tank trailers 57
- 8.12 Filling of tank trucks, tank trailers, and cargo liners 57
- 8.13 Operation of tank trucks, tank trailers, and cargo liners 58
- 8.14 Parking vehicles used to transport propane 58
- 8.15 Vehicles parked in public parking garages 59
- 8.16 Vehicles parked in private garages 59
- 8.17 Repair or servicing in private garages 59
- 8.18 Repair or servicing in repair garages 60

9 Vaporizers 60

- 9.1 General 60
- 9.2 Indirect vaporizers 61
- 9.3 Direct-fired vaporizers 62

10 Propane as an engine fuel 62

- 10.1 General 62
- 10.2 Engine fuel containers 63
- 10.3 Engine fuel piping, tubing, hose, and fittings 64
- 10.4 Engine fuel container equipment 65
- 10.5 Hydrostatic relief valves 65
- 10.6 Engine fuel vaporizers (converters) 65
- 10.7 Engine fuel regulators and valves 66
- 10.8 Servicing and parking indoors 66
- 10.9 Exchange of engine fuel containers 67

11 Installation of appliances, equipment, and containers on highway vehicles, recreational vehicles, mobile housing, outdoor food service units, and wash-mobiles 67

- 11.1 General 67
- 11.2 Installation of containers 68
- 11.3 Installation of cylinders 68
- 11.4 Equipment on cylinders connected for use 69
- 11.5 Installation of tanks 69
- 11.6 Piping, tubing, hose, and fittings 72
- 11.7 Appliances 73
- 11.8 Marking 74
- 11.9 Parking 75

Annexes

- A** (informative) — Purging procedures for propane containers 76
- B** (informative) — Guide for tank installations 81
- C** (informative) — Concrete trough 83
- D** (informative) — Cylinder inspection report 84
- E** (informative) — Barrier protection 85
- F** (informative) — Piping expansion and flexibility 86
- G** (informative) — Reference diagram for electrical classification 88
- H** (informative) — Sizing of dip tube length 89
- I** (informative) — Bar hole diagram 90
- J** (informative) — General information 91
- K** (informative) — Two-stage regulation 107
- L** (informative) — Hose connector lengths 109

Index 110

Tables

- 6.1** — Maximum permitted filling density of a cylinder by weight 21
- 6.2** — Maximum permitted filling density of a cylinder by liquid volume 21
- 6.3** — Cylinder storage clearances 23
- 6.4** — Storage of non-refillable cylinders in mercantile occupancies 28
- 6.5** — Storage of non-refillable cylinders in the backstock (warehouse) area of mercantile occupancies 29
- 7.1** — Maximum permitted filling density of a tank by liquid volume (rotary or slip-tube gauge) 39
- 7.2** — Maximum permitted filling density of a tank by liquid volume (fixed-liquid-level gauge) 39
- 7.3** — Underground tanks 41
- 7.4** — Location of above-ground tanks for consumer applications limited to vapour withdrawal and/or liquid withdrawal to a vaporizer 44
- 7.5** — Location of tanks at filling plants and container refill centres 47
- 7.6** — Electrical classification 51
- 10.1** — Mechanical ventilation rate in buildings 63

Preface

This is the tenth edition of CSA B149.2, *Propane storage and handling code*. It supersedes the previous editions, published in 2005 and 2000 by the Canadian Standards Association (CSA) as CAN/CSA-B149.2, in 1995, 1991, 1986, 1980, 1978, and 1976 by the Canadian Gas Association (CGA), and in 1969 by the Canadian Standards Association.

In 1958, the Canadian Standards Association published the first edition of CSA B149, *Installation Code for Gas Burning Appliances and Equipment*. It was superseded by later editions in 1962, 1966, and 1971. Following the publication of the 1966 edition, the decision was made to split the Code into two parts: the first part, B149.1, dealing with the installation requirements for appliances and equipment burning natural gas; the second part, B149.2, dealing with the installation of appliances and equipment burning propane. As a first step, B149.2 was prepared and first published in 1969.

The Canadian Gas Association was accredited by the Standards Council of Canada as the standards development organization responsible for preparing standards for gas-burning appliances and equipment, and in this connection took over responsibility for the B149 Code in 1974. New editions of the Code were subsequently published in 1976, 1978, 1980, 1986, 1991, and 1995.

On June 30, 1997, the Canadian Standards Association acquired International Approval Services (IAS), which was until then a joint venture of the American Gas Association (AGA) and the Canadian Gas Association. Under this agreement, CSA acquired the complete range of IAS standards administration, certification, and registration products and services for appliances and accessories fuelled by natural and liquefied petroleum gases. In 1998, the CSA B149 Installation Code Committee agreed to publish a *Natural Gas and Propane Installation Code* that would amalgamate the first seven sections of CAN/CGA-B149.1 and CAN/CGA-B149.2 to become CSA B149.1-00. This amalgamation was in response to the trend among the authorities having jurisdiction of combining licensing and training for natural gas and propane. The remaining sections 8 to 14 of CAN/CGA-B149.2 became CSA B149.2-00, *Propane Storage and Handling Code*.

In this 2010 edition, where a major change or addition to the previous edition of the Code has been made, the clause, table, or figure affected is identified by the symbol delta (Δ) in the margin. Users of the Code are advised that the change markers in the text are not intended to be all-inclusive and are provided as a convenience only; such markers cannot constitute a comprehensive guide to the revisions made to the Code. Care must therefore be taken not to rely on the change markers to determine the current requirements of the Code. As always, users of the Code must consider the entire Code and any local amendments.

The CSA B149 Installation Code Committee, which is responsible for preparing this Code, consists of members of the provincial gas inspection authorities, natural gas utilities, propane distributors, appliance, equipment, and accessory manufacturers, certification organizations, and representatives from the Heating, Refrigeration and Air Conditioning Institute of Canada, the Mechanical Contractors Association of Canada, and federal government departments. This Code has been formally approved by the CSA B149 Installation Code Committee and by the Interprovincial Gas Advisory Council.

January 2010

Notes:

- (1) Use of the singular does not exclude the plural (and vice versa) when the sense allows.
- (2) Although the intended primary application of this Code is stated in its Scope, it is important to note that it remains the responsibility of the users of the Code to judge its suitability for their particular purpose.
- (3) This publication was developed by consensus, which is defined by CSA Policy governing standardization — Code of good practice for standardization as “substantial agreement. Consensus implies much more than a simple majority, but not necessarily unanimity”. It is consistent with this definition that a member may be included in the Technical Committee list and yet not be in full agreement with all clauses of this publication.
- (4) To submit a request for interpretation of CSA Standards, please send the following information to inquiries@csa.ca and include “Request for interpretation” in the subject line:
 - (a) define the problem, making reference to the specific clause, and, where appropriate, include an illustrative sketch;

- (b) provide an explanation of circumstances surrounding the actual field condition; and
- (c) where possible, phrase the request in such a way that a specific “yes” or “no” answer will address the issue.

Committee interpretations are processed in accordance with the CSA Directives and guidelines governing standardization and are published in CSA's periodical Info Update, which is available on the CSA website at <http://standardsactivities.csa.ca>.

- (5)** CSA Standards are subject to periodic review, and suggestions for their improvement will be referred to the appropriate committee. To submit a proposal for change to CSA Standards, please send the following information to inquiries@csa.ca and include “Proposal for change” in the subject line:
 - (a) Standard designation (number);
 - (b) relevant clause, table, and/or figure number;
 - (c) wording of the proposed change; and
 - (d) rationale for the change.

B149.2-10

Propane storage and handling code

Δ 1 Scope

1.1

This Code applies to

- (a) the storage, handling, and transfer of propane;
- (b) the installation of **appliances, equipment, components, accessories, and containers** on highway vehicles, **recreational vehicles, mobile housing**, outdoor food service units, and **wash-mobiles** when propane is to be used for fuel purposes;
- (c) propane used as an engine fuel in other than highway vehicles; and
- (d) the installation of **containers** and **equipment** to be used for propane in distribution locations and **filling plants**.

1.2

This Code does not apply to

- (a) marine or pipeline terminals;
- (b) gas where used as a feedstock in petroleum refineries or chemical plants;
- (c) utility pipeline distribution and transmission pipelines;
- (d) refrigerated storage or underground reservoirs for propane;
- (e) propane used on boats;
- (f) propane used as a propellant in aerosol **containers**;
- (g) butane fuel **cylinders** of 5.3 oz (150 g) capacity or less; and
- (h) the installation of **appliances, equipment, components, accessories, and containers** other than those on highway vehicles, **recreational vehicles, mobile housing**, outdoor food service units, and **wash-mobiles** when propane is to be used for fuel purposes.

1.3

Where the term “propane” is used, the requirements of this Code include, and apply equally to, any material that is composed predominantly of any of the following hydrocarbons or mixtures of them: propane, propylene, butanes (normal butane or isobutane), and butylenes.

1.4

The values given in yard/pound units are the standard. This Code contains SI (metric) equivalents to yard/pound units so that the Code can be used in SI (metric) units. SI (metric) equivalents may be approximate.

1.5

In this Code, unless **approved** otherwise by the **authority having jurisdiction**, “shall” indicates a mandatory requirement; “should” indicates a recommendation or that which is advised but not mandatory; and “may” indicates an advisory or optional statement. Notes to the text do not include mandatory or alternative requirements. The purpose of a note is to separate from the text explanatory or informative material that is not properly a part of this Code. Notes to figures and tables, however, are considered part of the figure or table and may be written as mandatory requirements. Annexes are designated normative (mandatory) or informative (non-mandatory) to define their application.
