Legal Notice for Standards

Canadian Standards Association (CSA) standards are developed through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA is a private not-for-profit company that publishes voluntary standards and related documents. CSA has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA and the users of this document (whether it be in printed or electronic form), CSA is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA's and/or others' intellectual property and may give rise to a right in CSA and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Technical Committee on Fall Protection v

Subcommittee on Anchorage Connectors viii

Preface ix

1 Scope 1

2 Reference publications 2

3 Definitions 3

4 General requirements 4

5 Anchorage connector classifications 4

6 Design 5

6.1 Connection points 5

6.2 Cutting or abrasion 5

6.3 Materials and assembly processes 6

6.3.1 Metallic materials 6

6.3.2 Textiles and other synthetic materials 6

6.3.3 Other materials 7

6.4 Integral sub-components 7

7 Test design and performance 7

7.1 Supervision 7

7.2 Design of the testing program 7

7.2.1 Determination of combinations 7

7.2.2 Design 7

7.3 Anchorage connector testing program report 8

7.4 Test anchorages 8

7.4.1 Selection and design 8

7.4.2 Means of fastening 8

7.4.3 Free-standing anchorage connectors 8

7.4.4 Orientation 8

7.5 Testing of multiple connection points 8

7.6 Direction of loading 9

7.7 Serviceability load test 9

7.8 Static strength test 9

7.9 Dynamic strength test 9

7.9.1 Initial dynamic strength test 9

7.9.2 Reciprocal dynamic strength test 9

7.10 Operable gate testing 10

7.10.1 Gate face testing 10

7.10.2 Gate side testing 10

7.11 Corrosion test 10

8 Test equipment and procedures 10

8.1 Equipment 10

8.1.1 Drop test structure 10

- 8.1.2 Test connector elements 10
- 8.1.3 Test mass 10
- 8.1.4 Test lanyard 11
- 8.1.5 Quick-release mechanism 11
- 8.1.6 Arrest force measuring instrumentation 11
- 8.1.7 Gate load test pin 11
- 8.1.8 Gate load clamping fixture 11
- 8.2 Procedures 11
 - 8.2.1 Serviceability load test 11
 - 8.2.2 Static strength test 12
 - 8.2.3 Dynamic strength tests 13
 - 8.2.4 Operable gate tests 14
 - 8.2.5 Corrosion test 15

9 Instructions for use 15

10 Markings 16

Annexes

- A** (informative) — Examples of anchorage connector classifications and applications 21
- B** (informative) — Commentary 23
- C** (normative) — Class A or AT weld-on or bolt-on metallic anchorage connectors 30
- D** (normative) — Class A or AX basket, choker, and loop straps for use as fall-protection anchorage connectors 35
- E** (normative) — Class A tie-back lanyards for use as fall-protection anchorage connectors 39
- F** (normative) — Class AD tie-back self-retracting devices for use as fall-protection anchorage connectors 41
- G** (normative) — Class A beam clamps and mobile anchorage connectors 44
- H** (normative) — Class AD-N tripods 48

Tables

- 1** — Conditioning before dynamic testing 16

Figures

- 1** — Frequency response characteristics for the arrest force measuring instrumentation 17
- 2** — Gate face test rig for snap hook connector 18
- 3** — Gate face test rig for carabiner 18
- 4** — Side load test rig for snap hook connector 19
- 5** — Side load test rig for carabiner 19
- 6** — Abrasion conditioning for non-textile connection points 20
- 7** — Abrasion conditioning for textile connection points 20
