About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 21 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 21 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

15 Characteristics to be specified, and their methods of measurement.....	13
15.1 Power supply characteristics	13
15.1.1 Characteristics to be specified.....	13
15.1.2 Method of measurement.....	14
15.2 Tolerance of (long-term) power supply voltage variations.....	14
15.2.1 Characteristics to be specified.....	14
15.2.2 Methods of measurement	15
15.3 Tolerance of power supply frequency variations.....	15
15.3.1 Characteristics to be specified.....	15
15.3.2 Methods of measurement	16
15.4 Tolerance of power supply harmonics and ripple.....	16
15.4.1 Characteristics to be specified.....	16
15.4.2 Methods of measurement	17
15.5 Input characteristics.....	17
15.5.1 Rated source impedance, characteristic to be specified.....	17
15.5.2 Input impedance	17
15.5.3 Rated source e.m.f., characteristic to be specified	19
15.5.4 Minimum source e.m.f. for rated distortion-limited output voltage.....	19
15.6 Output characteristics	19
15.6.1 Rated load impedance, characteristic to be specified.....	19
15.6.2 Output source impedance	20
15.6.3 Output voltage and power (distortion-limited).....	20
15.6.4 Maximum effective output power (distortion-limited at 10 %).....	22

15.6.5	Regulation	23
15.6.6	Overload restoring time	24
15.7	Limiting characteristics	24
15.7.1	Overload source e.m.f.	24
15.7.2	Short-term maximum output voltage and power	24
15.7.3	Long-term maximum output voltage and power	25
15.7.4	Temperature-limited output power	26
15.8	Characteristics of protection circuits	27
15.8.1	General	27
15.8.2	Protection against potentially damaging combinations of output voltage and current	27
15.8.3	Characteristics of d.c. offset protection circuits	28
15.9	Sustaining-time for rated (distortion-limited) output voltage or power	29
15.9.1	General	29
15.9.2	Characteristic to be specified	31
15.9.3	Method of measurement	31
15.10	Gain	31
15.10.1	Voltage gain and e.m.f. gain	31
15.10.2	Maximum e.m.f. gain	31
15.10.3	Attenuation characteristic of the volume control	32
15.10.4	Attenuation characteristic of balance controls for multi-channel equipment	32
15.11	Response	33
15.11.1	Gain-frequency response	33
15.11.2	Gain-limited effective frequency range	33
15.11.3	Distortion-limited effective frequency range	34
15.11.4	Phase-frequency response	34
15.12	Amplitude non-linearity	34
15.12.1	General	34
15.12.2	Rated total harmonic distortion, characteristic to be specified	35
15.12.3	Total harmonic distortion under standard measuring conditions	35
15.12.4	Total harmonic distortion as a function of amplitude and frequency	35
15.12.5	Harmonic distortion of the n th order under standard measuring conditions	36
15.12.6	Harmonic distortion of the n th order as a function of amplitude and frequency	37
15.12.7	Modulation distortion of the n th order (where $n = 2$ or $n = 3$)	37
15.12.8	Difference-frequency distortion of the n th order (where $n = 2$ or $n = 3$)	39
15.12.9	Dynamic intermodulation distortion (DIM)	40
15.12.10	Total difference frequency distortion	42
15.12.11	Weighted total harmonic distortion	44
15.13	Noise	44
15.13.1	Characteristic to be specified	44
15.13.2	Method of measurement	45
15.14	Hum	45
15.14.1	General	45
15.14.2	Characteristics to be specified	45
15.14.3	Method of measurement	46
15.15	Balanced inputs and outputs	46
15.15.1	Balance of the input	46

15.15.2	Overload (distortion-limited) peak-to-peak common-mode input voltage.....	47
15.15.3	Balance of the output.....	48
15.16	Cross-talk and separation in multi-channel amplifiers.....	49
15.16.1	Characteristics to be specified.....	49
15.16.2	Method of measurement.....	50
15.17	Gain and phase differences between channels in multi-channel amplifiers.....	51
15.17.1	Gain difference.....	51
15.17.2	Phase difference.....	51
15.18	Dimensions and mass, characteristics to be specified.....	52
Annex A (informative)	Balanced interfaces.....	58
Annex B (informative)	Specification of a multi-channel amplifier.....	59
B.1	General.....	59
B.2	Example specification of a 5.1 channel amplifier.....	59
B.3	Example specification of a 5 channel amplifier.....	59
Bibliography	61
Figure 1	– Example block diagram for multi-channel amplifier.....	52
Figure 2	– Connection diagram of equipment for digital input.....	52
Figure 3	– Arrangements for the Class D amplifier.....	53
Figure 4	– Arrangements for measuring input impedance.....	53

INTERNATIONAL ELECTROTECHNICAL COMMISSION

SOUND SYSTEM EQUIPMENT –**Part 3: Amplifiers****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as far as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60268-3 has been prepared by IEC technical committee 100: Audio, video and multimedia systems and equipment.

This fifth edition cancels and replaces the fourth edition published in 2013. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) rated condition of digital input is newly specified;
- b) tolerance of rated power supply is changed;
- c) maximum effective output power is appended to output characteristics list;
- d) "Terms, definitions and rated values" clause is complemented.

This bilingual version (2018-12) corresponds to the English version, published in 2018-04.

The text of this standard is based on the following documents:

CDV	Report on voting
100/2960/CDV	100/3069/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60268 series, published under the general title *Sound system equipment*, can be found on the IEC website.

This part of IEC 60268 shall be used in conjunction with IEC 60268-1:1985 and IEC 60268-2:1987.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

The French version of this standard has not been voted upon.

SOUND SYSTEM EQUIPMENT –

Part 3: Amplifiers

1 Scope

This part of IEC 60268 applies to analogue amplifiers, and the analogue parts of analogue/digital amplifiers, which form part of a sound system for professional or household applications. It specifies the characteristics that should be included in specifications of amplifiers and the corresponding methods of measurement.

NOTE The methods of measurement for digital amplifiers and similar equipment are given in IEC 60066 [1].

In general, the specified methods of measurement are those which are seen to be most directly related to the characteristics. This does not exclude the use of other methods that give equivalent results.

In general, the methods are based on the simplest measuring equipment which can provide useful results. This does not exclude the use of more complex equipment that can give higher accuracy and/or allow automatic measurement and recording of results.

Rated conditions and standard measuring conditions are specified in order to allow measurements to be reliably repeated.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
