### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### IEC Catalogue - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

#### IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC Glossary - [www.iec.ch/glossary](http://www.iec.ch/glossary)

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

## CONTENTS

FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	9
2 Normative references .....	9
3 General notes on tests .....	10
4 Thickness.....	10
4.1 General.....	10
4.2 Determination of thickness by mechanical scanning.....	10
4.2.1 General .....	10
4.2.2 Measurement by a single sheet .....	11
4.3 Determination of thickness by gravimetric method.....	11
4.3.1 Measurement by a sample .....	11
4.3.2 Measurement by a roll .....	11
4.4 Crosswise thickness profile and lengthwise variation in thickness .....	11
5 Density.....	12
6 Width.....	12
7 Windability (bias/camber and sag) .....	12
7.1 Principle .....	12
7.2 General.....	12
7.3 Method A .....	12
7.3.1 Principle .....	12
7.3.2 Measurement of bias/camber .....	12
7.3.3 Measurement of sag .....	13
7.4 Method B .....	14
7.4.1 Principle .....	14
7.4.2 Apparatus.....	14
7.4.3 Test specimens .....	15
7.4.4 Procedure.....	15
7.4.5 Result.....	15
8 Surface roughness.....	15
9 Space factor.....	15
10 Coefficient of friction.....	16
11 Wetting tension (polyolefine films) .....	16
11.1 Test principle and introductory remarks.....	16
11.2 Apparatus .....	16
11.3 Reagents .....	16
11.4 Test specimens.....	17
11.5 Conditioning.....	17
11.6 Procedure .....	17
11.7 Evaluation.....	18
11.8 Report.....	18
12 Tensile properties.....	18
12.1 General.....	18
12.2 Test specimens.....	18
12.3 Speed of testing.....	18

12.4	Result .....	18
13	Edge tearing resistance .....	19
13.1	General.....	19
13.2	Principle .....	19
14	Tear resistance.....	19
15	Stiffness of film.....	19
16	Surface resistivity .....	19
17	Volume resistivity .....	19
17.1	Method 1: Electrode method .....	19
17.2	Method 2: Method for wound capacitor dielectric films or films too thin for Method 1.....	19
17.2.1	Principle .....	19
17.2.2	Test specimens .....	20
17.2.3	Procedure.....	20
17.2.4	Result.....	20
18	Dissipation factor and permittivity .....	20
18.1	General.....	20
18.2	Method 1.....	20
18.2.1	General .....	20
18.2.2	Sample and specimen handling .....	21
18.2.3	Sample conditioning prior to measurement .....	21
18.2.4	Measurements with contacting electrodes.....	21
18.2.5	Measurements with non-contacting electrodes.....	23
18.2.6	Test procedure .....	23
18.2.7	Report .....	23
18.3	Method 2.....	23
18.3.1	General .....	23
18.3.2	Dissipation factor at or above $5 \times 10^{-4}$ .....	24
18.3.3	Dissipation factor below $5 \times 10^{-4}$ .....	24
19	Dissipation factor under irregular conditions .....	24
20	Electric strength .....	24
20.1	AC and DC tests on film sheet sandwiched by metal electrodes.....	24
20.2	DC test using a wound capacitor.....	24
21	Electrical weak spots .....	24
21.1	General .....	24
21.2	Method A: Testing narrow strips of film in long lengths.....	25
21.2.1	Test equipment.....	25
21.2.2	Procedure.....	25
21.2.3	Results .....	25
21.3	Method B: Testing wide strips of film.....	25
21.3.1	General .....	25
21.3.2	Test equipment.....	25
21.3.3	Procedure.....	26
21.3.4	Results .....	26
21.4	Method C: Testing of film in rolls.....	26
21.4.1	General .....	26
21.4.2	Unreeling system.....	26
21.4.3	Fault counter .....	27

21.4.4	Procedure.....	27
21.4.5	Results .....	27
22	Resistance to breakdown by surface discharges.....	28
23	Electrolytic corrosion .....	28
24	Melting point.....	28
25	Dimensional change .....	28
25.1	Test specimens.....	28
25.2	Procedure .....	28
25.3	Results .....	28
26	Dimensional stability under tension with rising temperature .....	29
26.1	Test specimens.....	29
26.2	Procedure .....	29
26.3	Results .....	29
27	Dimensional stability under pressure with rising temperature.....	29
27.1	Test equipment .....	29
27.2	Test specimens.....	29
27.3	Procedure .....	29
27.4	Results .....	30
28	Resistance to penetration at elevated temperature .....	30
28.1	General.....	30
28.2	Principle .....	30
29	Volatile content (loss of mass on heating).....	30
29.1	Test specimens.....	30
29.2	Procedure .....	30
29.3	Result .....	30
30	Thermal endurance.....	30
31	Burning characteristics .....	31
31.1	Principle .....	31
31.2	Apparatus .....	31
31.3	Test specimens.....	31
31.4	Conditioning.....	31
31.5	Procedure .....	32
31.6	Interpretation of results.....	32
32	Water absorption in a damp atmosphere.....	33
32.1	Apparatus .....	33
32.2	Test specimens.....	33
32.3	Procedure .....	33
32.3.1	Water absorption of material as-received.....	33
32.3.2	Water absorption of dry material.....	33
32.4	Results .....	34
33	Absorption of liquid.....	34
33.1	Principle .....	34
33.2	Apparatus .....	34
33.3	Test specimens.....	34
33.4	Procedure .....	34
33.5	Calculations .....	35
33.6	Result .....	35

34	Ionic impurities .....	35
35	Effect of insulating varnishes .....	35
35.1	Procedure .....	35
35.2	Results .....	35
36	Effect of polymerisable resinous compounds in a liquid state.....	36
36.1	Procedure .....	36
36.2	Results .....	36

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**SPECIFICATION FOR PLASTIC FILMS  
FOR ELECTRICAL PURPOSES –****Part 2: Methods of test****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, accept IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60674-2 has been prepared by IEC technical committee 15: Solid electrical insulating materials.

This second edition cancels and replaces the first edition published in 1988 and Amendment 1 (2004). This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) this document was completely revised editorially and technically and included in the IEC 60674 series of standards;
- b) the test methods are updated to reflect today's state of the art;
- c) a method to obtain DC electric strength is now specified according to IEC 60243-2.

The text of this standard is based on the following documents:

CDV	Report on voting
15/742/CDV	15/760/RVC

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60674 series, published under the general title *Specification for plastic films for electrical purposes*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

## INTRODUCTION

This document is one of a series which deals with plastic films for electrical purposes. The series consists of three parts:

Part 1: Definitions and general requirements (IEC 60674-1)

Part 2: Methods of test (IEC 60674-2)

Part 3: Specifications for individual materials (IEC 60674-3 (all parts))

Currently in preview, click buy full version

# SPECIFICATION FOR PLASTIC FILMS FOR ELECTRICAL PURPOSES –

## Part 2: Methods of test

### 1 Scope

This part of IEC 60674 is applicable to plastic films used for electrical purposes. This part of IEC 60674 gives methods of test.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60212:2010, *Standard conditions for use prior to and during the testing of solid electrical insulating materials*

IEC 60216 (all parts), *Electrical insulating materials – Thermal endurance properties*

IEC 60243-1:2013, *Electric strength of insulating materials – Test methods – Part 1: Tests at power frequencies*

IEC 60243-2, *Electric strength of insulating materials – Test methods – Part 2: Additional requirements for tests using direct voltage*

IEC 60250:1969, *Recommended methods for the determination of the permittivity and dielectric dissipation factor of electrical insulating materials at power, audio and radio frequencies including metre wavelengths*

IEC 60343, *Recommended test methods for determining the relative resistance of insulating materials to breakdown by surface discharges*

IEC 60394-2:1972, *Varnished fabrics for electrical purposes – Part 2: Methods of test*

IEC 60426, *Electrical insulating materials – Determination of electrolytic corrosion caused by insulating materials – Test methods*

IEC 60454-2:2007, *Pressure-sensitive adhesive tapes for electrical purposes – Part 2: Methods of test*

IEC 60589, *Methods of test for the determination of ionic impurities in electrical insulating materials by extraction with liquids*

IEC TR 60648, *Method of test for coefficients of friction of plastic film and sheeting for use as electrical insulation*

IEC 60674-3 (all parts), *Specification for plastic films for electrical purposes – Part 3: Specifications for individual materials*
