About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	7
4 Essential ratings and characteristics.....	10
4.1 General requirements	10
4.1.1 Circuit identification and types	10
4.1.2 General function description	11
4.1.3 Manufacturing technology.....	11
4.1.4 Package identification.....	11
4.2 Application description	11
4.2.1 Conformance to system and/or interface information	11
4.2.2 Overall block diagram	11
4.2.3 Reference data	11
4.2.4 Electrical compatibility	11
4.2.5 Associated devices	12
4.3 Specification of the function	12
4.3.1 Detailed block diagram – Functional blocks	12
4.3.2 Identification and function of terminals.....	12
4.3.3 Function description	13
4.4 Limiting values (absolute maximum rating system).....	13
4.4.1 Requirements	13
4.4.2 Electrical limiting values	13
4.4.3 Temperatures	14
4.5 Operating conditions (within the specified operating temperature range).....	15
4.6 Electrical characteristics	15
4.7 Mechanical and environmental ratings, characteristics and data	15
4.8 Additional information	16
5 Measuring methods	16
5.1 General.....	16
5.1.1 General precautions	16
5.1.2 Characteristic impedance	16
5.1.3 Handling precautions	16
5.1.4 Types	16
5.2 Transmission loss (L_{trans}) and insertion loss (L_{ins}).....	17
5.2.1 Purpose	17
5.2.2 Measuring methods	17
5.3 Attenuation value (A_{att}).....	20
5.3.1 Purpose	20
5.3.2 Measuring methods	20
5.4 Attenuation range (A_{ran}).....	22
5.4.1 Purpose	22
5.4.2 Measuring methods	22
5.5 Attenuation accuracy (A_{aur}), Attenuation accuracy (RMS) ($A_{aur}(RMS)$).....	24
5.5.1 Purpose	24
5.5.2 Measuring methods	24

5.6	Input return loss ($L_{\text{ret(in)}}$)	26
5.6.1	Purpose	26
5.6.2	Measuring methods	26
5.7	Output return loss ($L_{\text{ret(out)}}$)	29
5.7.1	Purpose	29
5.7.2	Measuring methods	29
5.8	Input power at n dB compression ($P_{i(\text{ndB})}$).....	31
5.8.1	Purpose	31
5.8.2	Circuit diagram	31
5.8.3	Principle of measurement	31
5.8.4	Circuit description and requirements	31
5.8.5	Precautions to be observed	31
5.8.6	Measurement procedure	31
5.8.7	Specified conditions.....	31
5.9	Intermodulation distortion (two-tone)(P_n/P_1)	32
5.9.1	Purpose	32
5.9.2	Circuit diagram	32
5.9.3	Principle of measurement	32
5.9.4	Circuit description and requirements	33
5.9.5	Precautions to be observed	33
5.9.6	Measurement procedure	33
5.9.7	Specified conditions.....	33
5.10	Power at the intercept point (for intermodulation products) ($P_n(\text{IP})$)	34
5.10.1	Purpose	34
5.10.2	Circuit diagram	34
5.10.3	Principle of measurement	34
5.10.4	Circuit description and requirements	34
5.10.5	Precautions to be observed	34
5.10.6	Measurement procedure	34
5.10.7	Specified conditions.....	34
5.11	Relative phase shift (θ_{rel})	35
5.11.1	Purpose	35
5.11.2	Circuit diagram	35
5.11.3	Principle of measurement	35
5.11.4	Circuit description and requirements	35

INTERNATIONAL ELECTROTECHNICAL COMMISSION

SEMICONDUCTOR DEVICES –

Part 16-7: Microwave integrated circuits –
Attenuators

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. For this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publications”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as far as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60747-16-7 has been prepared by subcommittee 47E: Discrete semiconductor devices, of IEC technical committee 47: Semiconductor devices. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
47E/794/FDIS	47E/798/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 60747 series, published under the general title *Semiconductor devices*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

SEMICONDUCTOR DEVICES –

Part 16-7: Microwave integrated circuits – Attenuators

1 Scope

This part of IEC 60747 specifies the terminology, essential ratings and characteristics, and measuring methods of microwave integrated circuit attenuators.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60747-1:2006, *Semiconductor devices – Part 1: General*
IEC 60747-1:2006/AMD 1:2010

IEC 60747-4, *Semiconductor devices – Discrete devices – Part 4: Microwave diodes and transistors*

IEC 61340-5-1, *Electrostatics – Part 5-1: Protection of electronic devices from electrostatic phenomena – General requirements*

IEC TR 61340-5-2, *Electrostatics – Part 5-2: Protection of electronic devices from electrostatic phenomena – User guide*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <https://www.electropedia.org/>
- ISO Online browsing platform: available at <https://www.iso.org/obp>

3.1 reference state

initial state
state of minimum attenuation

3.2 attenuation state

state in which the attenuation is greater than that in the reference state
