### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: [www.iec.ch/webstore/custserv](http://www.iec.ch/webstore/custserv)

If you wish to give us your feedback on this publication or need further assistance, please visit the Customer Service Centre FAQ or contact us:

### A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour toute ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: [www.iec.ch/searchpub/cur\\_fut-f.htm](http://www.iec.ch/searchpub/cur_fut-f.htm)

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: [www.iec.ch/webstore/custserv/custserv\\_entry-f.htm](http://www.iec.ch/webstore/custserv/custserv_entry-f.htm)

## CONTENTS

FOREWORD.....	10
INTRODUCTION.....	13
1 Scope and object.....	14
1.1 Scope.....	14
1.1.1 Equipment included in scope .....	14
1.1.2 Equipment excluded from scope .....	14
1.1.3 Computing equipment.....	15
1.2 Object .....	15
1.2.1 Aspects included in scope .....	15
1.2.2 Aspects excluded from scope .....	15
1.3 Verification .....	15
1.4 Environmental conditions .....	16
1.4.1 Normal environmental conditions .....	16
1.4.2 Extended environmental conditions .....	16
2 Normative references .....	16
3 Terms and definitions .....	18
3.1 Equipment and states of equipment.....	18
3.2 Parts and accessories .....	19
3.3 Quantities.....	19
3.4 Tests.....	20
3.5 Safety terms.....	20
3.6 Insulation .....	22
4 Tests.....	23
4.1 General.....	23
4.2 Sequence of tests .....	24
4.3 Reference test conditions .....	24
4.3.1 Environmental conditions.....	24
4.3.2 State of equipment .....	24
4.4 Testing in SINGLE FAULT CONDITION .....	26
4.4.1 General .....	26
4.4.2 Application of fault conditions .....	26
4.4.3 Duration of tests .....	28
4.4.4 Conformity after application of fault conditions.....	29
5 Marking and documentation.....	30
5.1 Marking.....	30
5.1.1 General .....	30
5.1.2 Identification.....	30
5.1.3 MAINS supply .....	30
5.1.4 Fuses .....	32
5.1.5 TERMINALS, connections and operating devices.....	33
5.1.6 Switches and circuit-breakers .....	33
5.1.7 Equipment protected by DOUBLE INSULATION or REINFORCED INSULATION.....	34
5.1.8 Field-wiring TERMINAL boxes .....	34
5.2 Warning markings .....	34
5.3 Durability of markings.....	34

5.4	Documentation .....	35
5.4.1	General .....	35
5.4.2	Equipment RATINGS .....	35
5.4.3	Equipment installation .....	36
5.4.4	Equipment operation .....	36
5.4.5	Equipment maintenance and service .....	37
5.4.6	Integration into systems or effects resulting from special conditions .....	37
6	Protection against electric shock .....	37
6.1	General .....	37
6.1.1	Requirements .....	37
6.1.2	Exceptions .....	38
6.2	Determination of ACCESSIBLE parts .....	38
6.2.1	General .....	38
6.2.2	Examination .....	38
6.2.3	Openings above parts that are HAZARDOUS LIVE .....	39
6.2.4	Openings for pre-set controls .....	39
6.3	Limit values for ACCESSIBLE parts .....	39
6.3.1	Levels in NORMAL CONDITION .....	39
6.3.2	Levels in SINGLE FAULT CONDITION .....	40
6.4	Primary means of protection .....	43
6.4.1	General .....	43
6.4.2	ENCLOSURES and PROTECTIVE BARRIER .....	43
6.4.3	BASIC INSULATION .....	43
6.4.4	Impedance .....	43
6.5	Additional means of protection in case of SINGLE FAULT CONDITIONS .....	43
6.5.1	General .....	43
6.5.2	PROTECTIVE BONDING .....	44
6.5.3	SUPPLEMENTARY INSULATION and REINFORCED INSULATION .....	47
6.5.4	PROTECTIVE IMPEDANCE .....	47
6.5.5	Automatic disconnection of the supply .....	48
6.5.6	Current- or voltage-limiting device .....	48
6.6	Connections to external circuits .....	48
6.6.1	General .....	48
6.6.2	TERMINALS for external circuits .....	49
6.6.3	Circuits with TERMINALS which are HAZARDOUS LIVE .....	49
6.6.4	TERMINALS for stranded conductors .....	49
6.7	Insulation requirements .....	50
6.7.1	The nature of insulation .....	50
6.7.2	Insulation for MAINS CIRCUITS of OVERVOLTAGE CATEGORY II with a nominal supply voltage up to 300 V .....	52
6.7.3	Insulation for secondary circuits derived from MAINS CIRCUITS of OVERVOLTAGE CATEGORY II up to 300 V .....	56
6.8	Procedure for voltage tests .....	61
6.8.1	General .....	61
6.8.2	Humidity preconditioning .....	62
6.8.3	Test procedures .....	63
6.9	Constructional requirements for protection against electric shock .....	63
6.9.1	General .....	63
6.9.2	Insulating materials .....	64

6.9.3	Colour coding .....	64
6.10	Connection to the MAINS supply source and connections between parts of equipment .....	64
6.10.1	MAINS supply cords .....	64
6.10.2	Fitting of non-detachable MAINS supply cords .....	65
6.10.3	Plugs and connectors .....	66
6.11	Disconnection from supply source .....	67
6.11.1	General .....	67
6.11.2	Exceptions .....	67
6.11.3	Requirements according to type of equipment .....	67
6.11.4	Disconnecting devices .....	68
7	Protection against mechanical HAZARDS .....	69
7.1	General .....	69
7.2	Sharp edges .....	69
7.3	Moving parts .....	69
7.3.1	General .....	69
7.3.2	Exceptions .....	69
7.3.3	RISK assessment for mechanical HAZARDS to body parts .....	70
7.3.4	Limitation of force and pressure .....	71
7.3.5	Gap limitations between moving parts .....	72
7.4	Stability .....	74
7.5	Provisions for lifting and carrying .....	75
7.5.1	General .....	75
7.5.2	Handles and grips .....	75
7.5.3	Lifting devices and supporting parts .....	75
7.6	Wall mounting .....	76
7.7	Expelled parts .....	76
8	Resistance to mechanical stresses .....	76
8.1	General .....	76
8.2	ENCLOSURE rigidity test .....	77
8.2.1	Static test .....	77
8.2.2	Impact test .....	77
8.3	Drop test .....	79
8.3.1	Equipment other than HAND-HELD EQUIPMENT and DIRECT PLUG-IN EQUIPMENT .....	79
8.3.2	HAND-HELD EQUIPMENT and DIRECT PLUG-IN EQUIPMENT .....	79
9	Protection against the spread of fire .....	79
9.1	General .....	79
9.2	Eliminating or reducing the sources of ignition within the equipment .....	81
9.3	Containment of fire within the equipment, should it occur .....	81
9.3.1	General .....	81
9.3.2	Constructional requirements .....	81
9.4	Limited-energy circuit .....	84
9.5	Requirements for equipment containing or using flammable liquids .....	85
9.6	Overcurrent protection .....	85
9.6.1	General .....	85
9.6.2	PERMANENTLY CONNECTED EQUIPMENT .....	86
9.6.3	Other equipment .....	86
10	Equipment temperature limits and resistance to heat .....	86

10.1	Surface temperature limits for protection against burns .....	86
10.2	Temperatures of windings .....	87
10.3	Other temperature measurements .....	87
10.4	Conduct of temperature tests .....	88
10.4.1	General .....	88
10.4.2	Temperature measurement of heating equipment .....	88
10.4.3	Equipment intended for installation in a cabinet or a wall .....	88
10.5	Resistance to heat .....	89
10.5.1	Integrity of CLEARANCES and CREEPAGE DISTANCES .....	89
10.5.2	Non-metallic ENCLOSURES .....	89
10.5.3	Insulating material .....	89
11	Protection against HAZARDS from fluids .....	90
11.1	General .....	90
11.2	Cleaning .....	90
11.3	Spillage .....	91
11.4	Overflow .....	91
11.5	Battery electrolyte .....	91
11.6	Specially protected equipment .....	91
11.7	Fluid pressure and leakage .....	91
11.7.1	Maximum pressure .....	91
11.7.2	Leakage and rupture at high pressure .....	92
11.7.3	Leakage from low-pressure parts .....	92
11.7.4	Overpressure safety device .....	93
12	Protection against radiation, including laser sources, and against sonic and ultrasonic pressure .....	93
12.1	General .....	93
12.2	Equipment producing ionizing radiation .....	93
12.2.1	Ionizing radiation .....	93
12.2.2	Accelerated electrons .....	94
12.3	Ultraviolet (UV) radiation .....	94
12.4	Microwave radiation .....	95
12.5	Sonic and ultrasonic pressure .....	95
12.5.1	Sound level .....	95
12.5.2	Ultrasonic pressure .....	95
12.6	Laser sources .....	96
13	Protection against liberated gases and substances, explosion and implosion .....	96
13.1	Poisonous and injurious gases and substances .....	96
13.2	Explosion and implosion .....	96
13.2.1	Components .....	96
13.2.2	Batteries and battery charging .....	97
13.2.3	Implosion of cathode ray tubes .....	97
14	Components and subassemblies .....	97
14.1	General .....	97
14.2	Motors .....	99
14.2.1	Motor temperatures .....	99
14.2.2	Series excitation motors .....	99
14.3	Overtemperature protection devices .....	99
14.4	Fuse holders .....	99
14.5	MAINS voltage selection devices .....	100

14.6	MAINS transformers tested outside equipment.....	100
14.7	Printed wiring boards.....	100
14.8	Circuits or components used as TRANSIENT OVERVOLTAGE limiting devices .....	100
15	Protection by interlocks .....	101
15.1	General.....	101
15.2	Prevention of reactivating.....	101
15.3	Reliability .....	101
16	HAZARDS resulting from application.....	101
16.1	REASONABLY FORESEEABLE MISUSE.....	101
16.2	Ergonomic aspects .....	102
17	RISK assessment.....	102
Annex A	(normative) Measuring circuits for touch current (see 6.3).....	104
Annex B	(normative) Standard test fingers (see 6.2).....	107
Annex C	(normative) Measurement of CLEARANCES and CREEPAGE DISTANCES.....	109
Annex D	(normative) Parts between which insulation requirements are specified (see 6.4 and 6.5.3) .....	113
Annex E	(informative) Guideline for reduction of POLLUTION DEGREES.....	116
Annex F	(normative) ROUTINE TESTS.....	117
Annex G	(informative) Leakage and rupture from fluids under pressure .....	119
Annex H	(normative) Qualification of conformal coatings for protection against POLLUTION .....	124
Annex I	(informative) Line-to-neutral voltages for common MAINS supply systems .....	127
Annex J	(informative) RISK assessment .....	128
Annex K	(normative) Insulation requirements not covered by 6.7 .....	132
Annex L	(informative) Index of defined terms .....	153
	Bibliography.....	155
	Figure 1 – Measurements through openings in ENCLOSURES.....	39
	Figure 2 – Maximum duration of short-term ACCESSIBLE voltages in SINGLE FAULT CONDITION (see 6.3.2 a)) .....	41
	Figure 3 – Capacitance level versus voltage in NORMAL CONDITION and SINGLE FAULT CONDITION (see 6.3.1 c) and 6.3.2 c)) .....	42
	Figure 4 – Acceptable arrangement of protective means against electric shock .....	44

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

# **SAFETY REQUIREMENTS FOR ELECTRICAL EQUIPMENT FOR MEASUREMENT, CONTROL, AND LABORATORY USE –**

### **Part 1: General requirements**

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61010-1 has been prepared by IEC technical committee 66: Safety of measuring, control and laboratory equipment.

It has the status of a group safety publication, as specified in IEC Guide 104.

This third edition cancels and replaces the second edition published in 2001. It constitutes a technical revision.

This edition includes the following significant changes from the second edition, as well as numerous other changes.

- The scope of the standard has been expanded to include all locations where these products may be used, so that both professional and non-professional versions of these products are within the scope.

- The requirements for testing and measuring circuits (in various subclauses and the entirety of Clause 16) have been removed and included in a particular standard IEC 61010-2-030.
- Insulation requirements (6.7) have been completely rewritten.
  - Specific requirements have been added for solid insulation and thin-film insulation.
  - Subclause 6.7 now contains only the insulation requirements for MAINS CIRCUITS of OVERVOLTAGE CATEGORY II up to 300 V, and for secondary circuits.
  - The insulation requirements for all other circuits have been moved to a new Annex K.
- Additional requirements for protection against mechanical HAZARDS (Clause 7) have been included.
- Surface temperature limits (Clause 10) have been modified to conform to the limits of EN 563.
- Radiation requirements (Clause 12) have been modified, and take into account a distinction between intended emission and unintended emission.
- Requirements for reasonably foreseeable misuse and ergonomic aspects have been added (Clause 16).
- A new clause (Clause 17) has been added to deal with HAZARDS and environments not covered by the standard, along with a new informative annex (Annex J) dealing with RISK assessment.
- A new informative annex (Annex E) addresses methods of reducing the POLLUTION DEGREE of a micro-environment.
- Requirements for the qualification of coatings for protection against POLLUTION have been added (Annex H).
- A new informative annex (Annex I) has been added to further explain how to determine the WORKING VOLTAGE of a MAINS CIRCUIT.

The text of this standard is based on the following documents:

FDIS	Report on voting
66/414/FDIS	66/423/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 61010 series, under the general title: *Safety requirements for electrical equipment for measurement, control, and laboratory use*, may be found on the IEC website.

In this standard, the following print types are used:

- requirements and definitions: in roman type;
- NOTES: in smaller roman type;
- *conformity and tests: in italic type;*
- terms used throughout this standard which have been defined in Clause 3: SMALL ROMAN CAPITALS.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This International Standard specifies the safety requirements that are generally applicable to all equipment within its scope. For certain types of equipment, these requirements will be supplemented or modified by the special requirements of one, or more than one, particular part 2 of the standard which must be read in conjunction with the part 1 requirements.

# SAFETY REQUIREMENTS FOR ELECTRICAL EQUIPMENT FOR MEASUREMENT, CONTROL, AND LABORATORY USE –

## Part 1: General requirements

### 1 Scope and object

#### 1.1 Scope

##### 1.1.1 Equipment included in scope

This part of IEC 61010 specifies general safety requirements for the following types of electrical equipment and their accessories, wherever they are intended to be used.

##### a) Electrical test and measurement equipment

This is equipment which by electromagnetic means tests, measures, indicates or records one or more electrical or physical quantities, also non-measuring equipment such as signal generators, measurement standards, power supplies for laboratory use, transducers, transmitters, etc.

NOTE 1 This includes bench-top power supplies intended to aid a testing or measuring operation on another piece of equipment. Power supplies intended to power equipment are within the scope of IEC 61558 (see 1.1.2 h)).

This standard also applies to test equipment integrated into manufacturing processes and intended for testing manufactured devices.

NOTE 2 Manufacturing test equipment is likely to be installed adjacent to and interconnected with industrial machinery in this application.

##### b) Electrical industrial process-control equipment

This is equipment which controls one or more output quantities to specific values, with each value determined by manual setting, by local or remote programming, or by one or more input variables.

##### c) Electrical laboratory equipment

This is equipment which measures, indicates, monitors, inspects or analyses materials, or is used to prepare materials, and includes in vitro diagnostic (IVD) equipment.

This equipment may also be used in areas other than laboratories; examples include self-test IVD equipment to be used in the home and inspection equipment to be used to check people or material during transportation.

##### 1.1.2 Equipment excluded from scope

This standard does not apply to equipment within the scope of:

- a) IEC 60065 (Audio, video and similar electronic apparatus);
- b) IEC 60204 (Safety of machinery – Electrical equipment of machines);
- c) IEC 60335 (Household and similar electrical appliances);
- d) IEC 60364 (Electrical installations of buildings);
- e) IEC 60439 (Low-voltage switchgear and controlgear assemblies);
- f) IEC 60601 (Medical electrical equipment);
