

FINAL VERSION

VERSION FINALE

Maritime navigation and radiocommunication equipment and systems – Digital interfaces –

Part 460: Multiple talkers and multiple listeners – Ethernet interconnection – Safety and security

Matériels et systèmes de navigation et de radiocommunication maritimes – Interfaces numériques –

Partie 460: Émetteurs multiples et récepteurs multiples – Interconnexion Ethernet – Sûreté et sécurité

CONTENTS

FOREWORD	6
Introduction to the Amendment	8
1 Scope	9
2 Normative references	9
3 Terms and definitions	10
4 High-level requirements	16
4.1 Overview	16
4.2 Description	16
4.3 General requirements	17
4.3.1 Equipment and system requirements	17
4.3.2 Physical composition requirements	17
4.3.3 Logical composition requirements	17
4.4 Physical component requirements	18
4.4.1 450-Node	18
4.4.2 460-Node	18
4.4.3 460-Switch	18
4.4.4 460-Forwarder	19
4.4.5 460-Gateway and 460-Wireless gateway	19
4.5 Logical component requirements	19
4.5.1 Network monitoring function	19
4.5.2 System management function	19
4.6 System documentation requirements	19
4.7 Secure area requirements	19
5 Network traffic management requirements	20
5.1 460-Node requirements	20
5.2 460-Switch requirements	20
5.2.1 Resource allocation	20
5.2.2 Loop prevention	21
5.3 460-Forwarder requirements	21
5.3.1 Traffic separation	21
5.3.2 Resource allocation	21
5.3.3 Traffic prioritization	22
5.4 System design requirements	22
5.4.1 Documentation	22
5.4.2 Traffic	23
5.4.3 Connections between secure and non-secure areas	23
6 Security requirements	23
6.1 Security scenarios	23
6.1.1 Threat scenarios	23
6.1.2 Internal threats	23
6.1.3 External threats	24
6.2 Internal security requirements	24
6.2.1 General	24
6.2.2 Denial of service protection	24
6.2.3 REDS security	25
6.2.4 Access control	25

6.3	External security requirements	26
6.3.1	Overview	26
6.3.2	Firewalls	27
6.3.3	Direct communication	27
6.3.4	460-Node	27
6.3.5	460-Gateway	28
6.3.6	460-Wireless gateway	29
6.4	Additional security issues	29
7	Redundancy requirements	30
7.1	General requirements	30
7.1.1	General	30
7.1.2	Interface redundancy	30
7.1.3	Device redundancy	31
7.2	460-Node requirements	31
7.3	460-Switch requirements	31
7.4	460-Forwarder requirements	31
7.5	460-Gateway and 460-Wireless gateway requirements	31
7.6	Network monitoring function requirements	31
7.7	System design requirements	31
8	Network monitoring requirements	32
8.1	Network status monitoring	32
8.1.1	460-Network	32
8.1.2	460-Node	32
8.1.3	460-Switch	32
8.1.4	460-Forwarder	32
8.2	Network monitoring function	33
8.2.1	General	33
8.2.2	Network load monitoring function	34
8.2.3	Redundancy monitoring function	34
8.2.4	Network topology monitoring function	35
8.2.5	Syslog recording function	36
8.2.6	Redundancy of network monitoring function	36
8.2.7	Alert management	36
9	Controlled network requirements	38
10	Methods of testing and required test results	38
10.1	Subject of tests	38
10.2	Test site	38
10.3	General requirements	39
10.4	450-Node	39
10.5	460-Node	40
10.5.1	Network traffic management	40
10.5.2	Security	40
10.5.3	Redundancy	42
10.5.4	Monitoring	42
10.6	460-Switch	42
10.6.1	Resource allocation	42
10.6.2	Loop prevention	43
10.6.3	Security	43

10.6.4	Monitoring	44
10.7	460-Forwarder	45
10.7.1	Traffic separation.....	45
10.7.2	Resource allocation	45
10.7.3	Traffic prioritisation.....	46
10.7.4	Security	46
10.7.5	Monitoring	47
10.8	460-Gateway	48
10.8.1	Denial of service behaviour.....	48
10.8.2	Access control to configuration setup.....	48
10.8.3	Communication security.....	48
10.8.4	Firewall.....	49
10.8.5	Application server.....	50
10.8.6	Interoperable access to file storage of DMZ.....	50
10.8.7	Additional security	50
10.9	460-Wireless gateway.....	51
10.9.1	General	51
10.9.2	Security	51
10.10	Controlled network.....	51
10.11	Network monitoring function.....	51
10.11.1	General	51
10.11.2	Network load monitoring function.....	52
10.11.3	Redundancy monitoring function.....	52
10.11.4	Network topology monitoring function.....	53
10.11.5	Syslog recording function	53
10.11.6	Alert management	53
10.12	System level	55
10.12.1	General	55
10.12.2	System management function.....	55
10.12.3	System design.....	56
10.12.4	Network monitoring function	57
10.12.5	Network load monitoring function.....	57
10.12.6	Redundancy monitoring function.....	57
10.12.7	Network topology monitoring function	58
Annex A (informative) Communication scenarios between an IEC 61162-460 network and uncontrolled networks		59
A.1	General.....	59
A.2	Routine off-ship	59
A.3	Routine on-ship.....	60
A.4	460-Gateway usage for direct connection with equipment	60
Annex B (informative) Summary of redundancy protocols in IEC 62439 (all parts).....		61
Annex C (informative) Guidance for testing.....		62
C.1	Methods of test	62
C.2	Observation	62
C.3	Inspection of documented evidence	62
C.4	Measurement.....	62
C.5	Analytical evaluation	63
Annex D (informative) Some examples to use this document		64
Annex E (normative) IEC 61162 interfaces for the network monitoring function		68

Annex F (informative) Distribution of functions around 460-Network.....	69
Bibliography.....	71

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – DIGITAL INTERFACES –

Part 460: Multiple talkers and multiple listeners – Ethernet interconnection – Safety and security

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

DISCLAIMER

This Consolidated version is not an official IEC Standard and has been prepared for user convenience. Only the current versions of the standard and its amendment(s) are to be considered the official documents.

This Consolidated version of IEC 61162-460 bears the edition number 2.1. It consists of the second edition (2018-05) [documents 80/879/FDIS and 80/884/RVD] and its amendment 1 (2020-01) [documents 80/943/FDIS and 80/951/RVD]. The technical content is identical to the base edition and its amendment.

This Final version does not show where the technical content is modified by amendment 1. A separate Redline version with all changes highlighted is available in this publication.

International Standard IEC 61162-460 has been prepared by IEC technical committee 80: Maritime navigation and radiocommunication equipment and systems.

This second edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) 460-Switches and 460-Forwarders are required to implement IGMP snooping;
- b) connection between secure and non-secure areas requires a 460-Forwarder as an isolation element;
- c) SFI collision detection added as function of network monitoring;
- d) 460-Gateway and 460-Wireless gateway are no longer required to report to the network monitoring;
- e) all alerts from network monitoring have standardized alert identifiers.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

This International Standard is to be used in conjunction with IEC 61162-450:2018.

A list of all parts in the IEC 61162 series, published under the general title *Maritime navigation and radiocommunication equipment and systems – Digital interfaces*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer

Introduction to the Amendment

This amendment provides greater clarity to the external security requirements in 6.3, updates the alert management in 8.2.7 and associated tests in 10.11.6 to comply with bridge alert management and provides an improved test of firewalls in 10.8.4.

MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – DIGITAL INTERFACES –

Part 460: Multiple talkers and multiple listeners – Ethernet interconnection – Safety and security

1 Scope

This part of IEC 61162 is an add-on to IEC 61162-450 where higher safety and security standards are needed, for example due to higher exposure to external threats or to improve network integrity. This document provides requirements and test methods for equipment to be used in an IEC 61162-460 compliant network as well as requirements for the network itself and requirements for interconnection from the network to other networks. This document also contains requirements for a redundant IEC 61162-460 compliant network.

This document does not introduce new application level protocol requirements to those that are defined in IEC 61162-450.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
