About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD.....	7
1 Scope.....	9
2 Normative references	10
3 Terms and definitions	11
3.1 Content of the power drive system (PDS) and its installation.....	12
3.2 Content of the machine tool (MT) and its installation	13
3.3 Locations and equipment categories	14
3.4 Ports and interfaces.....	15
3.5 Components of the PDS.....	16
3.6 Test-related definitions	20
3.7 Phenomena-related definitions.....	21
4 Common requirements.....	25
4.1 General conditions	25
4.2 Tests	26
4.2.1 Conditions	26
4.2.2 Test report.....	27
4.3 Documentation for the user	27
5 Immunity requirements	27
5.1 General conditions	27
5.1.1 Performance (acceptance) criteria	27
5.1.2 Conditions during the test.....	29
5.2 Basic immunity requirements – Low-frequency (< 150 kHz) disturbances	30
5.2.1 Harmonics	30
5.2.2 Voltage dips and short interruptions.....	32
5.2.3 Frequency variations	34
5.2.4 Supply influences – Magnetic fields.....	35
5.3 Basic immunity requirements – High-frequency (≥ 150 kHz) disturbances	36
5.3.1 Conditions	36
5.3.2 Residential, commercial and light industrial environment	36
5.3.3 Industrial environment	37
5.4 Application of immunity requirements – Alternative verification methods	39
5.4.1 General	39
5.4.2 Simulation and calculation of harmonics	40
5.4.3 Alternative verification methods for voltage dips and short interruptions	40
5.4.4 Frequency variations	40
5.4.5 Immunity against electromagnetic fields by subcomponents testing	40
6 Emission.....	41
6.1 General emission requirements.....	41
6.2 General emission requirements for MT.....	41
6.3 Basic low-frequency (< 150 kHz) emission limits.....	41
6.3.1 Harmonics and interharmonics.....	41
6.3.2 Voltage fluctuations and flicker	42
6.3.3 Emissions in the frequency range from 2 kHz to 150 kHz.....	43
6.3.4 Common mode harmonic emission (low-frequency common mode voltage)	43
6.4 Conditions related to high-frequency (≥ 150 kHz) emission measurement	43
6.4.1 General requirements for measurements on a test site	43

6.4.2	Application of emission limits above 1 GHz.....	50
6.4.3	Connection requirements.....	50
6.4.4	Measurements requirements when a standard setup is not used.....	50
6.5	Basic high-frequency emission limits.....	51
6.5.1	EUT of categories C1 and C2.....	51
6.5.2	EUT of category C3.....	53
6.6	Engineering practice.....	54
6.6.1	EUT of category C4.....	54
6.6.2	General conditions.....	55
6.6.3	Filtering in IT power supply systems.....	55
6.6.4	Limits outside the boundary of an installation, for an EUT of category C4 – Example of propagation of disturbances.....	56
Annex A	(informative) EMC techniques.....	59
A.1	Application of PDSs and EMC.....	59
A.2	Load conditions regarding high-frequency phenomena.....	59
A.2.1	Load conditions during emission tests.....	59
A.2.2	Load conditions during immunity tests.....	60
A.2.3	Load test.....	60
A.3	Immunity to electromagnetic fields.....	60
A.3.1	Immunity to power frequency magnetic fields.....	60
A.3.2	Immunity to high frequency conducted disturbances.....	60
A.3.3	Immunity to high frequency fields.....	61
A.4	High-frequency emission measurement techniques.....	62
A.4.1	Impedance/artificial mains network (AMN).....	62
A.4.2	Performing high-frequency in-situ emission tests.....	64
A.4.3	Established experience with high power EUTs.....	64
Annex B	(informative) Low-frequency phenomena.....	65
B.1	Commutation notches.....	65
B.1.1	Evaluation conditions.....	65
B.1.2	Occurrence – Description.....	65
B.1.3	Calculation.....	68
B.1.4	Recommendations regarding commutation notches.....	69
B.2	Definitions related to harmonics and interharmonics.....	70
B.2.1	General discussion.....	70
B.2.2	Conditions of application.....	71
B.3	Application of harmonic emission standards.....	75
B.3.1	General.....	75
B.3.2	Public networks.....	75
B.3.3	Summation methods for harmonics in an installation – Practical rules.....	80
B.4	Installation rules – Assessment of harmonic compatibility.....	82
B.4.1	Low power industrial three-phase system.....	82
B.4.2	Large industrial system.....	85
B.4.3	Interharmonics and voltages or currents at higher frequencies.....	87
B.5	Voltage unbalance.....	87
B.5.1	Origin.....	87
B.5.2	Definition and assessment.....	88
B.5.3	Effect on BDM/CDM/PDS/MTs.....	90
B.6	Voltage dips – Voltage fluctuations.....	90
B.6.1	Voltage dips.....	90

B.6.2	Voltage fluctuation	92
Annex C (informative)	Reactive power compensation – Filtering	93
C.1	Installation	93
C.1.1	Usual operation	93
C.1.2	Power definitions under distorted conditions	93
C.1.3	Practical solutions	94
C.1.4	Reactive power compensation	95
C.1.5	Filtering methods	99
C.2	Reactive power and harmonics	101
C.2.1	Usual installation mitigation methods	101
C.2.2	Other solutions	103
Annex D (informative)	Considerations on high-frequency emission	107
D.1	User guidelines	107
D.1.1	Expected emission of BDM/CDM/PDS/MTs	107
D.1.2	Guidelines	109
D.2	Safety and RFI-filtering in power supply systems	111
D.2.1	Safety and leakage currents	111
D.2.2	Safety and RFI-filtering in power supply systems isolated from earth	111
Annex E (informative)	EMC analysis and EMC plan for EUTs of category C4	113
E.1	General – System EMC analysis applied to EUTs	113
E.1.1	Electromagnetic environment	113
E.1.2	System EMC analysis techniques	114
E.2	Example of EMC plan	116
E.2.1	Project data and description	116
E.2.2	Electromagnetic environment analysis	116
E.2.3	EMC analysis	117
E.2.4	Establishment of installation rules	118
E.2.5	Formal result and maintenance	119
E.3	Example of supplementary EMC plan for particular application	120
E.3.1	Electromagnetic environment complementary analysis	120
E.3.2	EMC analysis	121

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ADJUSTABLE SPEED ELECTRICAL
POWER DRIVE SYSTEMS –****Part 3: EMC requirements and specific test methods
for PDS and machine tools**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use, and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, accept IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 61800-3 has been prepared by subcommittee 22G: Adjustable speed electric power drive systems (PDS), of IEC technical committee 22: Power electronic systems and equipment. It is an International Standard.

It has the status of a product EMC standard in accordance with IEC Guide 107.

This fourth edition cancels and replaces the third edition published in 2017. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) extension of the scope to machine tools with one or more embedded PDS;
- b) extension of the frequency range for radiated immunity tests to 6 GHz;
- c) general updates in the normative part and the informative annexes.

The text of this International Standard is based on the following documents:

Draft	Report on voting
22G/461/FDIS	22G/466/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 61800 series, published under the general title *Adjustable speed electrical power drive systems*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under <https://webstore.iec.ch> in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

ADJUSTABLE SPEED ELECTRICAL POWER DRIVE SYSTEMS –

Part 3: EMC requirements and specific test methods for PDS and machine tools

1 Scope

This part of IEC 61800 specifies electromagnetic compatibility (EMC) requirements for adjustable speed power drive systems (PDSs) and machine tools (MTs). A PDS is an AC or DC motor drive including an electronic converter. Requirements are stated for AC and DC PDSs and MTs with input and/or output voltages (line-to-line voltage), up to 35 kV AC RMS. This document applies to equipment of all power ratings.

As a product EMC standard, this document can be used for the assessment of PDS and MT. It can also be used for the assessment of complete drive modules (CDM) or basic drive modules (BDM).

NOTE 1 BDMs and CDMs are parts of the PDS which are often marketed separately.

Traction applications and electric vehicles are excluded. Equipment which is defined as group 2 in CISPR 11:2015 is excluded.

NOTE 2 Examples of group 2 equipment are:

- welding equipment (arc welding, resistance welding, etc);
- electro-discharge machining equipment (EDM).

This document does not give requirements for the electrical machine which converts power between the electrical and mechanical forms within the PDS. Requirements for rotating electrical machines are covered by the IEC 60034 series. In this document, the term "motor" is used to describe the electrical machine, whether rotary or linear, and regardless of the direction of power flow.

This document is applicable to BDMs, CDMs, PDSs and MTs with or without radio function. However, this document does not specify any radio transmission and reception requirements.

NOTE 3 It is planned that the future edition 7 of CISPR 11¹ will contain a procedure how to address radio transmission and reception requirements, which is also applicable to products in the scope of this document.

This document defines the minimum requirements for emission and immunity in the frequency range from 0 Hz to 400 GHz. Tests are not required in frequency ranges where no requirements are specified.

BDMs, CDMs, PDSs and MTs covered by this document are those installed in residential, commercial and industrial locations. Requirements are given according to the environment classification.

BDMs, CDMs and PDSs are often included in a larger system. The system aspects are not covered by this document, but guidance is provided in the informative annexes.

¹ Under preparation. Stage at the time of publication: CISPR/NFDIS 11:2022.
