About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

CONTENTS

FOREWORD.....	7
INTRODUCTION.....	9
1 Scope.....	10
2 Normative references	10
3 Terms, definitions and nomenclature	10
4 Reasons for rehabilitating.....	12
4.1 General.....	12
4.2 Reliability and availability increase.....	13
4.3 Life extension and performance restoration.....	13
4.4 Performance improvement	14
4.5 Plant safety improvement.....	14
4.6 Environmental, social and regulatory issues.....	14
4.7 Maintenance and operating cost reduction	15
4.8 Other considerations.....	15
5 Phases of a rehabilitation project.....	15
5.1 General.....	15
5.2 Decision on organization.....	17
5.2.1 General	17
5.2.2 Expertise required	17
5.2.3 Contract arrangement.....	17
5.3 Level of assessment and determination of scope	18
5.3.1 General	18
5.3.2 Feasibility study – Stage 1.....	18
5.3.3 Feasibility study – Stage 2.....	19
5.3.4 Detailed study.....	19
5.4 Contractual issues	23
5.4.1 General	23
5.4.2 Specification requirements.....	23
5.4.3 Tendering documents and evaluation of tenders	24
5.4.4 Contract works(s)	24
5.5 Execution of project	24
5.5.1 Model test activities	24
5.5.2 Design, construction, installation and testing	25
5.6 Evaluation of results and compliance with guarantees.....	25
5.6.1 General	25
5.6.2 Turbine performance evaluation.....	25
5.6.3 Generator performance evaluation.....	26
5.6.4 Penalties and/or bonuses assessment	26
6 Scheduling, cost analysis and risk analysis	26
6.1 Scheduling.....	26
6.1.1 General	26
6.1.2 Scheduling – Assessment, feasibility and detailed study phases.....	27
6.1.3 Evaluating the scheduling component of alternatives	27
6.1.4 Scheduling specification and tendering phase	28
6.1.5 Scheduling project execution phases	28
6.2 Economic and financial analyses	29

6.2.1	General	29
6.2.2	Benefit-cost analysis.....	29
6.2.3	Identification of anticipated benefits.....	30
6.2.4	Identification of anticipated costs and benefits.....	31
6.2.5	Sensitivity analysis	32
6.2.6	Conclusions.....	32
6.3	Risk analysis.....	32
6.3.1	General	32
6.3.2	Non-achievement of performance risk.....	33
6.3.3	Risk of continued operation without rehabilitation	33
6.3.4	Extension of outage risk	34
6.3.5	Financial risks	34
6.3.6	Project scope risk	34
6.3.7	Other risks.....	35
7	Assessment and determination of scope of the work.....	35
7.1	General.....	35
7.2	Assessment of the site.....	36
7.2.1	Hydrology	36
7.2.2	Actual energy production	36
7.2.3	Environmental, social and regulatory issues	37
7.3	The assessment of the turbine	37
7.3.1	General	37
7.3.2	Turbine integrity assessment.....	38
7.3.3	Residual life.....	49
7.3.4	Turbine performance assessment.....	58
7.4	The assessment of related equipment	78
7.4.1	General	78
7.4.2	Generator and thrust bearing.....	79
7.4.3	Turbine governor.....	79
7.4.4	Turbine inlet and outlet valves, pressure relief valve.....	80
7.4.5	Auxiliary equipment.....	80
7.4.6	Equipment erection, dismantling and maintenance	81
7.4.7	Penstock and other water passages	81
7.4.8	Consequences of changes in plant specific hydraulic energy (head)	81
7.4.9	Grid integration.....	82
8	Hydraulic design and performance testing options	82
8.1	General.....	82
8.2	Computational hydraulic design	83
8.2.1	General	83
8.2.2	The role of CFD.....	83
8.2.3	The process of a CFD cycle.....	84
8.2.4	The accuracy of CFD results.....	84
8.2.5	How to use CFD for rehabilitation	85
8.2.6	CFD versus model tests.....	85
8.3	Model tests	86
8.3.1	General	86
8.3.2	Model test similitude	87
8.3.3	Model test content	87
8.3.4	Model test application.....	88

8.3.5	Model test location	90
8.4	Prototype performance test	90
8.4.1	General	90
8.4.2	Prototype performance test accuracy	91
8.4.3	Prototype performance test types	92
8.4.4	Evaluation of results	92
9	Specifications	93
9.1	General	93
9.2	Reference standards	93
9.3	Information to be included in the tender documents	94
9.4	Documents to be developed in the course of the project	95
Annex A (informative)	Check-list for evaluation of existing turbine	98
Annex B (informative)	Assessment examples	131
B.1	General	131
B.2	Runner (applicable to Francis, Kaplan, propeller and Pelton)	131
B.2.1	Documentation – available data	131
B.2.2	Design review	132
B.2.3	Inspection items	132
B.2.4	Assessment of inspection results	133
B.2.5	Current condition assessment	135
B.2.6	Scope of work	135
B.3	Stay ring	136
B.3.1	Documentation – available data	136
B.3.2	Design review	137
B.3.3	Inspection items	137
B.3.4	Assessment of inspection results	137
B.3.5	Current condition assessment	138
B.3.6	Scope of work (possible action to be taken)	138
B.4	Guide vanes	139
B.4.1	Documentation – available data	139
B.4.2	Design review	139
B.4.3	Inspection items	139
B.4.4	Assessment of inspection results	140
B.4.5	Current condition assessment	141
B.4.6	Scope of work	141
B.5	Real life example: Pelton runner with severe crack	142
B.5.1	Data of the Pelton runner	142
B.5.2	Fatigue analysis	142
B.5.3	Fracture-mechanics analysis	143
B.5.4	Results for the Pelton runner	144
Annex C (informative)	Checklist for evaluation of related equipment	145
Bibliography	149
Figure 1	– Flow diagram depicting the logic of the rehabilitation process	16
Figure 2	– Critical zones for cracks “A” and “B” in Pelton runner buckets	48
Figure 3	– Bathtub curve	50
Figure 4	– Process of residual life estimation	51
Figure 5	– Schematic behaviour for the different stages in the fatigue process	52

Figure 6 – Start-up and full load strain gauge signal on Francis blade.....	57
Figure 7 – Relative efficiency versus relative output – Original and new runners.....	60
Figure 8 – Relative efficiency versus output – Original and new runners – Outardes 3 generating station	61
Figure 9 – Efficiency and distribution of losses versus specific speed for Francis turbines (model) in 2005	62
Figure 10 – Relative efficiency gain following modification of the blades on the La Grande 3 runner, in Quebec, Canada.....	64
Figure 11 – Potential efficiency improvement for Francis turbine rehabilitation.....	68
Figure 12 – Potential efficiency improvement for Kaplan turbine rehabilitation	69
Figure 13 – Cavitation and corrosion-erosion in Francis runner.....	70
Figure 14 – Back side erosion of the entrance into a Pelton bucket.....	71
Figure 15 – Leading edge cavitation erosion on a Francis pump-turbine caused by extended periods of operation at very low loads.....	72
Figure 16 – Severe particle erosion damage in a Francis runner	73
Table 1 – Expected life of a hydropower plant and its subsystems before major work	13
Table 2 – Typical routine inspections	39
Table 3 – Example of a rating system for the inspection results	55
Table 4 – Example of a typical list of turbine components for Francis and Kaplan with different weight factors X_1 to X_7 based on relative importance	56
Table 5 – Example of rating of a single component assessment including three assessment criteria.....	56
Table 6 – Francis turbine potential efficiency improvement (%) for runner profile modifications only	63
Table 7 – Potential impact of design and condition of runner seals on Francis turbine efficiency with new replacement runner or rehabilitated runner (%).....	65
Table 8 – Potential total gain in efficiency from the replacement of a Francis turbine runner including the blade profile improvements, the restoration of surface condition and the reduction of seal losses	66
Table 9 – Potential additional efficiency improvement by rehabilitation/replacement of other water passage components on a Francis turbine (%)	66
Table A.1 – Assessment of turbine embedded parts – Stay ring	98
Table A.2 – Assessment of turbine embedded parts – Spiral or semi-spiral case	99
Table A.3 – Assessment of turbine embedded parts – Discharge ring	100
Table A.4 – Assessment of turbine embedded parts – Draft tube	102
Table A.5 – Assessment of turbine non-embedded, non-rotating parts – Headcover	104
Table A.6 – Assessment of turbine non-embedded, non-rotating parts – Intermediate and inner headcovers	107
Table A.7 – Assessment of turbine non embedded, non-rotating parts – Bottom ring	108
Table A.8 – Assessment of turbine non embedded, non-rotating parts – Guide vanes.....	110
Table A.9 – Assessment of turbine non embedded, non-rotating parts – Guide vane operating mechanism.....	112
Table A.10 – Assessment of turbine non embedded, non-rotating parts – Operating ring.....	113
Table A.11 – Assessment of turbine non embedded, non-rotating parts – Servomotors.....	114

Table A.12 – Assessment of turbine non embedded, non-rotating parts – Guide bearings.....	115
Table A.13 – Assessment of turbine non embedded, non-rotating parts – Turbine shaft seal (mechanical seal or packing box)	117
Table A.14 – Assessment of turbine non embedded, non-rotating parts – Thrust bearing support.....	117
Table A.15 – Assessment of turbine non embedded, non-rotating parts – Nozzles	118
Table A.16 – Assessment of turbine non embedded, non-rotating parts – Deflectors and energy dissipation	119
Table A.17 – Assessment of turbine rotating parts – Runner	120
Table A.18 – Assessment of turbine rotating parts – Runner	123
Table A.19 – Assessment of turbine rotating parts – Runner	125
Table A.20 – Assessment of turbine rotating parts – Turbine shaft.....	126
Table A.21 – Assessment of turbine rotating parts – Oil head and oil distribution pipes	127
Table A.22 – Assessment of turbine auxiliaries – Speed and load regulation system (governor).....	128
Table A.23 – Assessment of turbine auxiliaries – Turbine aeration system	129
Table A.24 – Assessment of turbine auxiliaries – Lubrication system (guide vane mechanism)	130
Table C.1 – Assessment of related equipment – Governor.....	145
Table C.2 – Assessment of related equipment – Generator and thrust bearing.....	146
Table C.3 – Assessment of related equipment – Penslock and turbine inlet valves	147
Table C.4 – Assessment of related equipment – Civil works.....	148
Table C.5 – Assessment of related equipment – Crane, erection equipment	148

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**HYDRAULIC TURBINES, STORAGE PUMPS AND PUMP-TURBINES –
REHABILITATION AND PERFORMANCE IMPROVEMENT**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62256 has been prepared by IEC technical committee 4: Hydraulic turbines.

This second edition cancels and replaces the first edition published in 2008. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- Tables 2 to 23 modified, completed and moved to Annex A;
- 7.3.2:
 - subclauses moved with text changes;
 - new subclauses on temperature, noise, galvanic corrosion, galling and replacement of components without assessment;
- 7.3.3: complete new subclause on residual life;
- Tables 29 to 32 moved to Annex C;
- new Annex B with assessment examples.

This bilingual version (2017-12) corresponds to the monolingual English version, published in 2017-05.

The text of this standard is based on the following documents:

FDIS	Report on voting
4/323/FDIS	4/326/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

The French version of this standard has not been voted upon.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

Hydro plant owners make significant investments annually in rehabilitating plant equipment (turbines, generators, transformers, penstocks, gates etc.) and structures in order to improve the level of service to their customers and to optimize their revenue. In the absence of guidelines, owners may be spending needlessly, or may be taking unnecessary risks and thereby achieving results that are less than optimal. This document is intended to be a tool in the optimisation and decision process.

Edition 1 of this International Standard was based on the IEA document *Guidelines on Methodology for Hydroelectric Francis Turbine Upgrading by Runner Replacement*.

HYDRAULIC TURBINES, STORAGE PUMPS AND PUMP-TURBINES – REHABILITATION AND PERFORMANCE IMPROVEMENT

1 Scope

This document covers turbines, storage pumps and pump-turbines of all sizes and of the following types:

- Francis;
- Kaplan;
- propeller;
- Pelton (turbines only);
- bulb turbines.

This document also identifies without detailed discussion, other powerhouse equipment that could affect or be affected by a turbine, storage pump, or pump-turbine rehabilitation.

The object of this document is to assist in identifying, evaluating and executing rehabilitation and performance improvement projects for hydraulic turbines, storage pumps and pump-turbines. This document can be used by owners, consultants, and suppliers to define:

- needs and economics for rehabilitation and performance improvement;
- scope of work;
- specifications;
- evaluation of results.

This document is intended to be:

- an aid in the decision process;
- an extensive source of information on rehabilitation;
- an identification of the key milestones in the rehabilitation process;
- an identification of the points to be addressed in the decision processes.

This document is not intended to be a detailed engineering manual nor a maintenance document.

2 Normative references

There are no normative references in this document.

3 Terms, definitions and nomenclature

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

Wherever turbines or turbine components are referred to in the text of this document, they shall be interpreted also to mean the comparable units or components of storage pumps or pump-turbines as the case requires.

For the purpose of this document, the term “rehabilitation” is defined as some combination of:

- restoration of equipment capacity and/or equipment efficiency to near “as-new” levels;
