CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Terms, definitions and abbreviations	7
4 Summary of receiver implementation.....	8
4.1 General.....	8
4.2 Basic operation of a T-DMB transmitter.....	8
4.3 Functional requirements	10
4.4 Summary of audio service	10
4.5 Summary of video service	11
4.6 Summary of data service.....	11
5 Requirements on receiver implementations	11
5.1 T-DMB service selection and basic requirements	11
5.2 Audio service requirements	11
5.3 Video service requirements	12
5.3.1 General	12
5.3.2 Video objects.....	12
5.3.3 Audio objects.....	12
5.3.4 Auxiliary data objects	12
5.3.5 Delays between objects.....	12
5.4 Receiver channel switch time and initial access time (delay)	12
5.4.1 Delay.....	12
5.4.2 Initial access time (delay)	13
5.4.3 Channel switch time	13
5.5 Audio and video synchronization.....	13
5.6 Functional requirements of the interfaces of auxiliary data	13
6 Synchronization of objects in T-DMB video service.....	13
7 Video.....	14
7.1 General.....	14
7.2 Two-layer architecture.....	14
7.3 AVC features applied to T-DMB.....	15
8 Audio.....	16
8.1 General.....	16
8.2 Summary of BSAC and HE-AAC V2.....	16
8.3 Operational method for decoding audio objects	17
9 Auxiliary data	18
9.1 General.....	18
9.2 Examples of services using auxiliary data	18
9.3 Receiver structure for processing auxiliary data	18
9.4 Transmission of image data.....	19
10 Minimum RF performance specification	19
10.1 RF summary.....	19
10.2 RF frequency band.....	19
10.3 RF input	20
10.4 RF operational characteristics	20

Bibliography.....	24

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**TERRESTRIAL DIGITAL MULTIMEDIA
BROADCASTING (T-DMB) RECEIVERS –**

Part 1: Basic requirement

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as far as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62516-1 has been prepared by technical area 1: Terminals for audio, video and data services and content, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

The text of this standard is based on the following documents:

FDIS	Report on voting
100/1490/FDIS	100/1521/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

TERRESTRIAL DIGITAL MULTIMEDIA BROADCASTING (T-DMB) RECEIVERS –

Part 1: Basic requirement

1 Scope

This part of IEC 62516 specifies the characteristics and minimum required performance for terrestrial digital multimedia broadcasting (T-DMB) receivers. The contents of this standard include T-DMB system information, video, audio, and MPEG-4 BIFS data.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
