IEEE Smart Grid Research has been obtained from sources believed to be reliable, and reviewed by credible members of IEEE Technical Societies, Standards Committees, and/or Working Groups, and/or relevant technical organizations. Neither IEEE nor its authors guarantee the accuracy or completeness of any information published herein, and neither IEEE nor its authors shall be responsible for any errors, omissions, or damages arising out of the use of this information.

Likewise, while the author and publisher believe that the information and guidance given in this work serve as an enhancement to users, all parties must rely upon their own skill and judgment when making use of it. Neither the author nor the publisher assumes any liability to anyone for any loss or damage caused by any error or omission in the work, whether such error or omission is the result of negligence or any other cause. Any and all such liability is disclaimed.

This work is published with the understanding that IEEE and its authors are supplying information through this publication, not attempting to render engineering or other professional services. If such services are required, the assistance of an appropriate professional should be sought. IEEE is not responsible for the statements and opinions advanced in the publication.

Review Policy

The information contained in IEEE Smart Grid Research publications is reviewed and evaluated by peer reviewers of relevant IEEE Technical Societies, Standards Committees and/or Working Groups, and/or relevant technical organizations. IEEE acknowledges with appreciation their dedication and contribution of time and effort on behalf of IEEE.

Acknowledgments

IEEE wishes to thank the following people for their outstanding contributions to the IEEE Smart Grid Vision for Vehicular Technology project:

- Liuqing Yang
- Joachim Taiber
- Russell Lefevre
- Hiroaki Nishi
- Philip Krein
- Koichi Inoue
- Iqbal Husain

These project leaders have worked tirelessly outside of their own academic and professional endeavors to conceptualize and develop the framework of the vision and to oversee the writing and execution of this final document. As contributing editors to the document, they were instrumental in providing oversight, clarity, and overall direction to the men and women who authored this Smart Grid vehicular technology vision.

Table of Contents

1. Introduction	1
2. Penetration models	2
3. Vehicle grid interaction.....	3
4. High-order functions of EV.....	4
5. Factors related to EV	6
