**The Commissioning Process
Applied to Lighting and
Control Systems**

Publication of this Design Guide
has been approved by IES.
Suggestions for revisions
should be directed to IES.

Prepared by:
**The Lighting Commissioning Committee of the
Illuminating Engineering Society of North America**

Copyright 2011 by the Illuminating Engineering Society of North America.

Approved by the IES Board of Directors, June 6, 2011, as a Transaction of the Illuminating Engineering Society of North America.

All rights reserved. No part of this publication may be reproduced in any form, in any electronic retrieval system or otherwise, without prior written permission of the IES.

Published by the Illuminating Engineering Society of North America, 120 Wall Street, New York, New York 10005.

IES Standards and Guides are developed through committee consensus and produced by the IES Office in New York. Careful attention is given to style and accuracy. If any errors are noted in this document, please forward them to Rita Harrold, Director Educational and Technical Development, at the above address for verification and correction. The IES welcomes and urges feedback and comments.

Printed in the United States of America.

ISBN # 978-0-87995-255-6

DISCLAIMER

IES publications are developed through the consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on lighting recommendations. While the IES administers the process and establishes policies and procedures to promote fairness in the development of consensus, it makes no guaranty or warranty as to the accuracy or completeness of any information published herein.

The IES disclaims liability for any injury to persons or property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document.

In issuing and making this document available, the IES is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the IES undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The IES has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the IES list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or statement of compliance with the requirements of this document shall not be attributable to the IES and is solely the responsibility of the certifier or maker of the statement.

Acknowledgments

Special thanks for Jill Klores, LC, Essential Light Design Studio and Ardra Zinkon, MIES, ALD Associate, Tec Inc. for their contributions to this document.

Special thanks to Craig DiLouie, ZING Communications, Inc. for his writing and editing contributions to this document.

Special thanks to the Lighting Controls Association and Seattle City Light for contributing detailed Construction Checklists and Performance Testing procedures for popular lighting control systems.

Special thanks to Peerless Lighting, Énergie Lighting, Litecontrol Corp., a-light and Tivoli, LLC for contributing to the Design Checklists and WattStopper for contributing to the occupancy sensor Construction Checklist.

Contents

1.0	Introduction	1
1.1	Benefits	1
1.2	Commissioning and the Lighting Practitioner	1
1.3	About This Design Guide	4
2.0	Definitions	4
3.0	Pre-Design Phase	5
3.1	The Commissioning Team	5
3.2	The Commissioning Plan	5
3.3	Owner's Project Requirements (OPR)	9
3.4	Other Pre-Design Phase Activities	10
4.0	Design Phase	10
4.1	Basis of Design (BOD)	12
4.2	Project Phasing	12
4.3	Design Criteria	16
4.4	Other Design Phase Activities	16
5.0	Construction Phase	16
5.1	Construction Administration and Occupancy	18
5.2	Performance Testing	18
5.3	Issues Log	20
5.4	Systems Manual	20
6.0	Occupancy And Operations Phase	21
6.1	Ongoing Commissioning	21
	Annex A - Example of Basis of Design Related to Lighting and Control	22
	Annex B - Design Criteria for Lighting and Control Systems	22
B.1	The Space	22
B.1.1	Volume of the Architectural Space	22
B.1.2	Programming Activities and Illuminance Criteria	23
B.1.3	Constraints	23

B.2 Lamps and Auxiliary Component Criteria	24
B.2.1 Lamp Performance	24
B.3 Maintenance Considerations	24
B.4 Sustainability	24
B.5 Luminaire Selection	24
B.6 Additional Considerations	25
B.7 Specialty Luminaires	25
B.8 Control	26
B.8.1 Occupancy Sensors	26
B.8.1.1 Sensor Technology	26
B.8.1.2 Mounting Guidelines	26
B.8.1.3 Sensor Sensitivity	26
B.8.1.4 Sensor Integration	27
B.8.1.5 Measurement and Verification	27
B.8.1.6 Low-Voltage Relay Schedule Based Time Sweep Control	27
B.8.2 Daylight Harvesting Control Systems	27
Annex C - Construction Checklists for Lighting and Control Systems	28
C.1 Luminaire/Ballast Verification Checklist	28
C.2 Lamp Verification Checklist	28
C.3 Controls Verification Checklist	29
C.4 Luminaire Checklist	29
C.5 Daylighting Design Materials Checklist	30
C.6 Lighting Controls Checklist	31
C.7 Occupancy Sensors	32
C.8 Low-Voltage Relay Schedule-Based Time Sweep Control Systems	33
C.9 Daylight Harvesting Control Systems	34
C.10 Architectural Lighting Control Systems	35
Annex D - Sample Performance Testing Procedures for Daylighting And Lighting Control Systems	36
D.1 Making the Building Ready	36
D.2 Occupancy Sensors	36
D.3 Low-Voltage Relay Schedule-Based Time Sweep Control Systems	38
D.4 Daylight Harvesting Control Systems	39
References	40
