Foreword

This Japanese Industrial Standard has been revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Sash Manufacturers Association (JSMA)/Japanese Standards Association (JSA) with a draft being attached, based on the provision of Article 12, paragraph (1) of the Industrial Standardization Act applied mutatis mutandis pursuant to the provision of Article 16 of the said Act. This edition replaces the previous edition (**JIS A 4702:2015**), which has been technically revised.

However, **JIS A 4702: 2015** may be applied in the **JIS** mark certification based on the relevant provisions of Article 30, paragraph (1), etc. of the Industrial Standardization Act until 21 February 2022.

This **JIS** document is protected by the Copyright Act.

Attention is drawn to the possibility that some part of this Standard may conflict with patent rights, published patent application or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, published patent application or utility model rights.

Doorsets

1 Scope

This Japanese Industrial Standard specifies requirements for the manually operated swing and sliding doorsets (hereafter referred to as doorsets) to be installed mainly at the entryway through the exterior wall or the indoor partition wall of buildings. This Standard is not applicable to doors used for providing access to a veranda or to the outside that cannot be locked from outside, or revolving doors.

A list of technically significant revisions from the previous edition with reasons is given in Annex B.

2 Normative references

Part or all of the provisions of the following standards, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

- JIS A 1416 *Acoustics — Method for laboratory measurement of airborne sound insulation of building elements*
- JIS A 1513 *Windows and doorsets — General rule for test method*
- JIS A 1515 *Windows and doorsets — Wind resistance test*
- JIS A 1516 *Windows and doorsets — Air permeability test*
- JIS A 1517 *Windows and doorsets — Watertightness test under dynamic pressure*
- JIS A 1518 *Doorsets — Cold heavy body impact test*
- JIS A 1519 *Windows and doorsets — Determination of opening and closing forces*
- JIS A 1521 *Doorsets — Diagonal deformation test under static load*
- JIS A 1523 *Doorsets — Static torsion test*
- JIS A 1524 *Doorsets — Vertical load test*
- JIS A 1530 *Windows and doors — Resistance to repeated opening and closing — Test method*
- JIS A 2102-1 *Thermal performance of windows and doors — Calculation of thermal transmittance — Part 1 : General*
- JIS A 2102-2 *Thermal performance of windows and doors — Calculation of thermal transmittance — Part 2 : Numerical method for frames*
- JIS A 2103 *Thermal performance of windows and doors — Calculation of solar heat gain coefficient*
- JIS A 4710 *Windows and doorsets — Thermal resistance test*
