Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Safety Appliances Association (JSAA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14. Consequently **JIS A 5759:2008** is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Adhesive films for glazings

Introduction

This Japanese Industrial Standard was established in 1982 and has gone through six revisions since then. Since the last revision made in 2008, diversification of applications and improvement in product quality have been recognized. The revision at this time aims to adapt the contents to these changes.

No corresponding International Standard has been established at this point. The comparison table between previous and current editions of this Standard of technically significant revisions is given in Annex B.

1 Scope

This Standard specifies adhesive films (hereafter referred to as films) to be applied to the glazing in parts of buildings such as windows and entrances. The glazing, for the purpose of this Standard, do not include organic glass.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

- JIS B 7503 *Mechanical dial gauge*
- JIS B 7512 *Steel tape measure*
- JIS B 7516 *Metal rules*
- JIS B 7721 *Tension/compression testing machines — Verification and calibration of the force-measuring system*
- JIS B 7753 *Light exposure and light-and-water-exposure apparatus (Open-flame carbon arc type)*
- JIS K 6255-2 *Rubber, vulcanized or thermoplastic — Determination of hardness — Part 2 : IRHD method (hardness between 10 IRHD and 100 IRHD)*
- JIS S 3106 *Testing method on transmittance, reflectance and emittance of flat glasses and evaluation of solar heat gain coefficient*
- JIS R 3202 *Float glass and polished plate glass*
- JIS Z 0237 *Testing methods of pressure-sensitive adhesive tapes and sheets*
- JIS Z 2245 *Rockwell hardness test — Test method*
