## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry, through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Japan Research Institute for Screw Threads and Fasteners (JFRI)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS B 1126:2009** is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

# Hexagon washer head tapping screws

## Introduction

This Japanese Industrial Standard has been prepared based on the second edition of **ISO 7053**, published in 2011, by editing and incorporating items (shape and dimensions, product specifications and designation of products) that correspond to **JIS** contents without modification of technical contents.

The portions given sidelines or dotted underlines are the matters not given in the corresponding International Standard. A list of modifications with the explanations is given in Annex JB

This Standard contains the following Annex, not given in the ISO standard, for providing requirements that reflect the manufacturing and use of the product in Japan.

Annex JA (normative) Hexagon washer head tapping screws with Class 1 to Class 4 threads

## 1 Scope

This Standard specifies the characteristics of hexagon washer head tapping screws with thread sizes from ST2.2 to ST8 inclusive.

The characteristics of hexagon washer head tapping screws with Class 1 to Class 4 threads that are not in accordance with **JIS B 1007** are specified in Annex JA.

NOTE: The International standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 7053 : 2011 *Hexagon washer head tapping screws* (MOD)

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and **JIS** are IDT (identical), MOD (modified), and NEQ (not equivalent) according to **ISO/IEC Guide 21-1**.

## 2 Normative references

The following standards contain provisions which, through reference in this text, constitute the provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS B 0101 *Screw threads and fasteners — Vocabulary*

JIS B 0143 *Fasteners — Bolts, screws, studs and nuts — Symbols and descriptions of dimensions*

NOTE: Corresponding International Standard : ISO 225 : 2010 *Fasteners — Bolts, screws, studs and nuts — Symbols and descriptions of dimensions*
