

2023 National Board Digital Library “Single User” Instructional License Agreement

Carefully read the following terms and conditions before using the pdf file

COPYRIGHT & LICENSE

The *National Board Inspection Code* (NBIC) is a copyrighted publication of the National Board of Boiler and Pressure Vessel Inspectors. As such, this copyright extends to any/all published versions of the NBIC including printed copies or Web subscription.

You do not own this copy of the NBIC; the National Board has licensed this copy to you for the use described herein. This pdf file is licensed for use by a single user. “Use” means loaded in temporary memory or permanent storage on the computer. The National Board reserves all rights not expressly granted to you.

I understand that I am being provided a pdf file containing the 2023 NBIC in consideration of my representation and/or agreement that:

- I may photocopy the contents solely for my own use but I am prohibited from making such photocopy available to others for copying.
- I will not make the NBIC electronically available through downloading, file sharing or through any other means.
- Additionally, I will not loan the pdf file for the purpose of photocopy, electronic download, file sharing or for any other copying means.
- I understand that any unauthorized duplication of the NBIC through my actions, either deliberate or unintentional, directly or indirectly, may also subject me to a claim of copyright infringement.
- I further understand that any attempt to electronically alter information in the file renders the device legally void and unusable for all future reference.

TERM

These terms and conditions are effective until terminated.

LIMITED WARRANTY

The files are provided ‘as is’ without warranty of any kind, either expressed or implied, including but not limited to implied warranties of merchantability and fitness for any particular purpose.

The National Board does not warrant that the functions contained in the files will meet your requirements or that the operation of the files will be uninterrupted or error free. You assume responsibility for selecting the software to achieve your intended results, and for the use and results obtained from the software.

LIMITATION OF REMEDIES

In no event will the National Board be liable to you for any damages, including any lost profits, lost savings, or any other incidental or consequential damages arising from the use or inability to use such program even if the National Board has been advised of the possibility of such damages, or for any claim by any other party.

Some states do not allow the limitation or exclusion of liability for incidental or consequential damage, so the above exclusion may not apply to you.

GENERAL

This Agreement will be governed by the laws of the state of Ohio.

Should you have any questions concerning this Agreement, you may contact the National Board by emailing info@nbbi.org.

PART 3

REPAIRS AND ALTERATIONS

NATIONAL BOARD INSPECTION CODE
2023 EDITION
DATE OF ISSUE — JULY 1, 2023

This code was developed under procedures accredited as meeting the criteria for American National Standards. The Consensus Committee that approved the code was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory and Jurisdictional agencies, and the public-at-large.

The National Board does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

The National Board does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable Letters Patent, nor assume any such liability. Users of a code are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code.

The National Board accepts responsibility for only those interpretations issued in accordance with governing National Board procedures and policies that preclude the issuance of interpretations by individual committee members.

The above National Board symbols are registered with the US Patent Office.

“National Board” is the abbreviation for The National Board of Boiler and Pressure Vessel Inspectors.

No part of this document may be reproduced in any form, in an electronic retrieval system or otherwise, without the prior written permission of the publisher.

All charts, graphs, tables, and other criteria that have been reprinted from the *ASME Boiler and Pressure Vessel Code*, Sections I, IV, VIII, and X are used with the permission of the American Society of Mechanical Engineers. All Rights Reserved.

PART 3 — REPAIRS AND ALTERATIONS

TABLE OF CONTENTS

Introduction	X
Foreword	XIV
Personnel	XVI
Section 1	General and Administrative Requirements	1
1.1	Scope	1
1.2	Construction Standards for Pressure-Retaining Items	1
1.3	Inspector	2
1.3.1	Authorization	2
1.3.2	Inspections and Certifications	2
1.4	Accreditation	2
1.4.1	Accreditation Process	3
1.4.2	National Board “R” Symbol Stamp	3
1.5	Quality System	3
1.5.1	Outline of Requirements for a Quality System for Qualification for the National Board “R” <i>Certificate of Authorization</i>	3
1.6	“NR” Program Requirements	9
1.6.1	Scope	9
1.6.2	General	9
1.6.2.1	Definitions	10
1.6.3	Prerequisites for Issuing a National Board “NR” <i>Certificate of Authorization</i>	11
1.6.4	Obtaining or Renewing a National Board “NR” <i>Certificate of Authorization</i>	12
1.6.5	Quality Assurance Program	12
1.6.6	Quality Assurance Program Requirements for Category 1 Activities	13
1.6.6.1	Scope	13
1.6.6.2	Quality Program Elements	13
1.6.7	Quality Assurance Program Requirements for Category 2 Activities	20
1.6.7.1	Scope	20
1.6.7.2	Quality Program Elements	20
1.6.8	Quality Assurance Program Requirements for Category 3 Activities	28
1.6.8.1	Scope	28
1.6.8.2	Quality Program Elements	28
1.6.9	Interface with the Owner’s Repair/Replacement Program (For Categories 1, 2, and 3 as Applicable)	33
Section 2	Welding, Brazing, Fusing, and Heat Treatment	35
2.1	Scope	35
2.2	Welding, Brazing and Fusing	35
2.2.1	Procedure Specifications	35
2.2.1.1	Procedure Specifications with Impact Testing	35
2.2.2	Standard Welding Procedure Specifications	35
2.2.3	Performance Qualification	36
2.2.4	Qualification Records	36
2.2.5	Qualified Personnel Identification	36
2.2.6	Continuity of Qualified Personnel	36
2.2.6.1	Process Continuity Records	36
2.3	Standard Welding Procedure Specifications (SWPS)	37
2.4	AWS Reference Standards	37
2.5	Heat Treatment	38
2.5.1	Preheating	38
2.5.2	Postweld Heat Treatment (PWHT)	39
2.5.3	Alternative Welding Methods Without Postweld Heat Treatment	42
2.5.3.1	Welding Method 1	43

2.5.3.2	Welding Method 2	44
2.5.3.3	Welding Method 3	45
2.5.3.4	Welding Method 4	46
2.5.3.5	Welding Method 5	48
2.5.3.6	Welding Method 6	48
2.5.3.7	Welding Method 7	49
Section 3	Requirements for Repairs and Alterations	51
3.1	Scope	51
3.2	General Requirements for Repairs and Alterations	51
3.2.1	Material Requirements for Repairs and Alterations	51
3.2.2	Replacement Parts	51
3.2.3	Drawings	52
3.2.4	Design Requirements for Repairs and Alterations	52
3.2.5	Calculations	53
3.2.6	Reference to Other Codes and Standards	53
3.2.7	Change of Service	53
3.3	Repairs to Pressure-Retaining Items	53
3.3.1	Defect Repairs	53
3.3.2	Routine Repairs	53
3.3.3	Examples of Repairs	54
3.3.4	Repair Methods	56
3.3.4.1	Scope	56
3.3.4.2	Defect Repairs	56
3.3.4.3	Wasted Areas	58
3.3.4.4	Seal Welding	63
3.3.4.5	Re-Ending or Piecing Pipes or Tubes	65
3.3.4.6	Patches	66
3.3.4.7	Stays	68
3.3.4.8	Repair of Pressure-Retaining Items Without Complete Removal of Defects	68
3.3.4.9	Tube Plugging in Firetube Boilers	69
3.3.5	Repair of ASME Section VIII, Division 2 or 3, Pressure Vessels	69
3.3.5.1	Scope	69
3.3.5.2	Repair Plan	69
3.4	Alterations	70
3.4.1	Re-Rating	70
3.4.2	Alterations Based on Allowable Stress Values	70
3.4.3	Encapsulation	71
3.4.4	Examples of Alterations	72
3.4.5	Alteration of ASME Code Section VIII, Division 2 or 3, Pressure Vessels	73
3.4.5.1	Alteration Plan	73
Section 4	Examination and Testing	75
4.1	Scope	75
4.2	Nondestructive Examination	75
4.3	Pressure Gages, Measurement, Examination, and Test Equipment	75
4.4	Examination and Test for Repairs and Alterations	75
4.4.1	Test or Examination Methods Applicable to Repairs	76
4.4.2	Test or Examination Methods Applicable to Alterations	78
Section 5	Certification/Documentation and Stamping	80
5.1	Scope	80
5.2	Documentation	80
5.2.1	Preparation of Form R-1 (Report of Repair)	80
5.2.2	Preparation of Form R-2 (Report of Alteration)	80
5.2.3	Preparation of Form R-3 Report of Parts Fabricated by Welding	81
5.2.4	Preparation of Form R-4 Report Supplement Sheet	81
5.2.5	Preparation of Form NR-1, Report of Repair/Replacement Activities for Nuclear Facilities	81

5.2.6	Preparation of Form NVR-1, Report of Repair/Replacement Activities for Nuclear Pressure Relief Devices.....	81
5.3	Distribution of Form R-1	82
5.4	Distribution of Form R-2	82
5.5	Registration of Forms – General	82
5.5.1	Registration for Repairs	82
5.5.2	Registration for Alterations	82
5.5.3	Registration for Fiber-Reinforced Vessels	82
5.5.4	Registration for Nuclear Repair/Replacement Activities	83
5.5.5	Registration for Graphite Vessels.....	83
5.6	Form Registration Log	83
5.7	Stamping Requirements for Repairs and Alterations	83
5.7.1	General	83
5.7.2	Stamping Requirements for Repairs	83
5.7.3	Stamping Requirements for Alterations	83
5.7.4	Stamping Requirements for Parts	84
5.7.5	Specific Requirements for Stamping and Nameplates	84
5.8	Stamping for Fiber-Reinforced Vessels	86
5.8.1	Stamping for Repairs	86
5.8.2	Stamping for Alterations	86
5.9	Stamping Requirements for Yankee Dryers	86
5.10	Alternative Marking and Stamping for Graphite Pressure Equipment	87
5.11	Removal of Original Stamping or Nameplate	87
Section 6	Supplements	88
Supplement 1	Steam Locomotive Firetube Boiler Repairs	88
S1.1	Scope	88
S1.1.1	Federal Railroad Administration (FRA)	88
S1.1.2	Requirements for Welding Activities	88
S1.1.3	Materials.....	88
S1.1.3.1	Material List for Steam Locomotive Boilers	88
S1.1.4	Formula and Calculations for Steam Locomotive Boilers.....	89
S1.2	Locomotive Firetube Boiler Repair.....	90
S1.2.1	Repair of Staybolt Holes	90
S1.2.2	Threaded Staybolts	90
S1.2.3	Ball Socket-Type Flexible Staybolts, Sleeves, and Caps	92
S1.2.4	Seal Welded Staybolts	95
S1.2.5	Welded Installation of Staybolts	96
S1.2.5.1	Un-Threaded Filler-Welded Staybolts	96
S1.2.6	Diagonal Braces, Girdet Braces, and Throat Sheet/Tubesheet Braces	96
S1.2.6.1	Girdet Stays and Crown Bars	98
S1.2.6.2	Sling Stays	99
S1.2.6.3	Expansion Stays	100
S1.2.7	Threaded Stays	102
S1.2.8	Patch Bolts	102
S1.2.9	Flues, Arch Tubes, Circulators, Thermic Syphons	103
S1.2.9.1	Flue and Tube Re-Ending	104
S1.2.9.2	Arch Tubes	104
S1.2.9.3	Tube Wall Thickness for Arch Tubes	106
S1.2.9.4	Thermic Syphons	106
S1.2.9.5	Circulators	108
S1.2.9.6	Installation of Boiler Flues	108
S1.2.9.7	Ferrules	109
S1.2.10	Repairs and Alterations to Boiler Barrel Unstayed Areas	109
S1.2.11	Repairs and Alterations to Boiler Barrel Stayed Area	110
S1.2.11.1	Firebox Sheet Repair	110
S1.2.11.2	Fireboxes and Other Stayed Area Patches	110
S1.2.11.3	Repair of Stayed Firebox Sheets Grooved or Wasted at the Mudring	111

S1.2.11.4	Mudring Repairs	112
S1.2.11.5	Repair of Firebox, Wrapper, and Tubesheet Knuckles	113
S1.2.11.6	Tubesheet Repairs	119
S1.2.12	Seams and Joints	120
S1.2.12.1	Caulking Riveted Seams and Rivet Heads	120
S1.2.12.2	Threaded Openings in Vessel Walls, Bushings, and Welded Nozzles (Washout Plug Holes and Other Connections)	121
S1.2.13	Fittings and Gages	122
S1.2.13.1	Water Gage Connection	122
S1.2.14	Throttle Pipes, Dry Pipes, Superheater Headers & Front End Steam Pipes	123
Supplement 2 Historical Boilers	124
S2.1	Scope	124
S2.2	Introduction	124
S2.3	Responsibilities	124
S2.4	Repairs and Alterations	124
S2.5	Construction Standards	124
S2.6	Accreditation	125
S2.7	Materials	125
S2.7.1	Material List for Historical Boiler Repairs	125
S2.7.2	Replacement Parts	126
S2.8	Welded Repair Inspection	126
S2.9	Welding	126
S2.10	Heat Treatment	126
S2.11	Nondestructive Examination and Testing	127
S2.12	Documentation	127
S2.13	Repair Methods	127
S2.13.1	Repair of Threaded Staybolt Holes	128
S2.13.2	Installation of Threaded Staybolts	128
S2.13.3	Seal Welding of Threaded Staybolts	129
S2.13.4	Installation of Welded Staybolts	130
S2.13.5	Threaded Studs	131
S2.13.6	Patch Bolts	131
S2.13.7	Flue and Tube Re-Ending	132
S2.13.8	Flue and Tube Installation	134
S2.13.9	Repairs and Alterations to Unstayed Areas	136
S2.13.9.1	Weld Buildup of Wastage and Grooving in Unstayed Areas	136
S2.13.9.2	Welded Repair of Cracks in Unstayed Areas	137
S2.13.9.3	Welded Flush Patches in Unstayed Areas	137
S2.13.9.4	Repair of Cracks, Grooving, and Wastage Using a Riveted Patch in Unstayed Areas	138
S2.13.9.5	Barrel Replacement	139
S2.13.10	Repairs and Alterations to Stayed Areas	140
S2.13.10.1	Weld Buildup of Wastage and Grooving in Stayed Areas	140
S2.13.10.2	Welded Repair of Cracks in Stayed Areas	140
S2.13.10.3	Welded Flush Patches in Stayed Areas	140
S2.13.10.4	Repair of Stayed Firebox Sheets Grooved or Wasted at the Mudring	141
S2.13.11	Repair of Firebox and Tubesheet Knuckles	143
S2.13.11.1	Weld Buildup of Wastage and Grooving in Firebox and Tubesheet Knuckles	143
S2.13.11.2	Welded Repair of Cracks in Firebox and Tubesheet Knuckles	143
S2.13.11.3	Welded Flush Patches in Firebox and Tubesheet Knuckles	144
S2.13.12	Repair of Tubesheets	146
S2.13.12.1	Weld Buildup of Wastage and Grooving in Tubesheets	146
S2.13.12.2	Welded Repair of Cracks in Tubesheets	146
S2.13.12.3	Welded Flush Patches in Tubesheets	147
S2.13.13	Seams, Joints, and Rivets	148
S2.13.13.1	Caulking Riveted Seams and Rivet Heads	148
S2.13.13.2	Rivet Holes	149
S2.13.13.3	Assembly of Riveted Joints	149
S2.13.13.4	Riveting	149

S2.13.13.5	Seal Welding Seam, Joints, and Rivet Heads	153
S2.13.14	Repair of Openings	154
S2.13.14.1	Repair of Threaded Openings	154
S2.13.14.2	Repair of Handhole Openings	154
S2.13.14.3	Repair of Fusible Plug Opening	155
S2.13.14.4	Repair of Handhole Doors	156
Supplement 3	Repair and Alteration of Graphite Pressure Equipment	157
S3.1	Scope	157
S3.2	Repairs	157
S3.3	Routine Repairs	159
S3.4	Alterations	159
S3.5	Repair Guide for Impervious Graphite	160
S3.5.1	Introduction	160
S3.5.2	Typical Graphite Fractures	164
S3.5.2.1	Major Fracture	164
S3.5.2.2	Intermediate Fracture	164
S3.5.2.3	Minor Fracture	165
S3.5.2.4	Finishing the Repair	166
S3.5.3	Graphite Repair by Plug Stitching	166
S3.5.3.1	Plug Stitching Procedure (See NBIC Part 3, Figure S3.5.3)	167
S3.5.4	Plugging or Leaking of Damaged Tubes	168
S3.5.5	Tube Replacement	170
S3.5.6	Reimpregnation of Graphite Parts (Tubesheets, Heads, and Blocks)	172
S3.5.6.1	Control of Impregnation Material	173
Supplement 4	Repair and Alteration of Fiber-Reinforced Thermoplastic	
	Pressure Equipment	174
S4.1	Scope	174
S4.2	Qualifications for "R" Certificate Holder Designee	174
S4.3	Tools	175
S4.4	Limitations	175
S4.5	Repair Limitations for Filament Wound Vessels	175
S4.6	Vessels Fabricated Using Elevated Temperature Cured Resin Systems	175
S4.7	Code of Construction	176
S4.8	Materials	176
S4.9	Replacement Parts	176
S4.10	Secondary Bonding	176
S4.10.1	Secondary Bonding Procedure Specifications	177
S4.10.2	Performance Qualifications	177
S4.10.3	Records	177
S4.10.4	Secondary Bonder's Identification	177
S4.10.5	Secondary Bonder's Continuity	177
S4.11	Curing	177
S4.12	Nondestructive Examination	177
S4.13	Pressure and Acoustic Emission Tests	182
S4.13.1	Pressure Gages, Measurement, and Examination and Test Equipment	182
S4.14	Acceptance Inspection	182
S4.14.1	Stamping	182
S4.14.2	Documentation	182
S4.14.3	Registration of Documentation	182
S4.14.4	Distribution of Documentation	182
S4.15	Pressure Testing for Repairs	182
S4.16	Additional Requirements for Repairs	183
S4.16.1	Scope	183
S4.16.2	Drawings	183
S4.16.3	Repair Plan	183
S4.16.4	Routine Repairs	184
S4.16.5	Repair Methods	184

S4.17	Additional Requirements for Alterations	184
S4.17.1	Scope	184
S4.17.2	Design	184
S4.17.3	Alteration Plan	185
S4.17.4	Calculations	185
S4.17.5	Re-Rating	185
S4.17.6	Pressure Testing	186
S4.18	Repair and Alteration Methods	187
S4.18.1	General Requirements	187
S4.18.2	Classification of Repairs	187
S4.18.2.1	Type 1A – Repair of the Corrosion Barrier	187
S4.18.2.2	Type 1B – Repair of the Corrosion Barrier for Vessels with Precision Bores	189
S4.18.2.3	Type 2 – Corrosion Barrier and Internal Structural Layer Repairs	191
S4.18.2.4	Type 3 – External Structural Layer Repairs	191
S4.18.2.5	Type 4 – Alterations	193
S4.18.2.6	Type 5 – Miscellaneous General External Repairs or Alterations	193
S4.18.2.7	Type 6 – Thermoplastic Repairs	193
S4.18.2.8	Type 7 – Gel Coat Repairs	194
S4.19	Repair of High Pressure Filament Wound Vessels	194
S4.19.1	Scope	194
S4.19.2	Level of Damage	194
S4.19.3	Thickness Considerations	195
S4.19.4	Impact Damage Considerations	195
S4.19.5	Assessment of Damage Depth	195
S4.19.6	Repair Procedure	195
S4.19.7	Acceptance of the Vessel for Return to Service	196
Supplement 5	General Requirements for Repairs and Alterations of Yankee Dryers	197
S5.1	Scope	197
S5.2	Examinations and Test Methods	197
S5.3	Yankee Dryer Repair Methods	197
S5.3.1	Replacement Parts for Yankee Dryers	197
S5.4	Repair Guide for Yankee Dryers	197
S5.5	Repairs That Do Not Require Stamping or Nameplate Attachment	198
S5.6	Damage Repair	198
S5.6.1	Repair of Local Thinning	198
S5.6.2	Assessment of Crack-Like Flaws	199
S5.6.3	Driven Plug Repair	200
S5.6.4	Threaded Plug Repair	200
S5.7	Alterations to Yankee Dryers	200
S5.7.1	Scope	200
S5.7.2	Alteration Types	200
S5.7.3	Pressure Testing of Alterations	201
Supplement 6	Repair, Alteration, and Modification of DOT Transport Tanks	206
S6.1	Scope	206
S6.2	Definitions	206
S6.3	Construction Standards	206
S6.4	Accreditation and Registration	206
S6.5	Materials	206
S6.6	Replacement Parts	206
S6.7	Authorization	207
S6.8	Inspection	207
S6.8.1	Inspector Duties for Repairs, Alterations, and Modifications	207
S6.9	Welding	208
S6.9.1	Welding Procedure Specification	208
S6.9.2	Standard Welding Procedure Specifications	208
S6.9.3	Performance Qualification	208
S6.9.4	Welding Records	208

S6.9.5	Welders' Identification	205
S6.9.6	Welders' Continuity	205
S6.10	Heat Treatment.....	205
S6.10.1	Preheating.....	205
S6.10.2	Postweld Heat Treatment	205
S6.10.3	Alternatives to Postweld Heat Treatment	205
S6.11	Nondestructive Examination.....	206
S6.12	Coatings and Linings.....	206
S6.13	Measurement, Examination, and Test Equipment	206
S6.14	Acceptance Inspection	206
S6.15	General Stamping Requirements	206
S6.15.1	Removal of Original Stamping or Nameplate	207
S6.16	"R" Forms	207
S6.16.1	Documentation	207
S6.16.2	Preparation of "R" Forms.....	207
S6.16.3	Distribution	207
S6.16.4	Registration of Form R-1 and Form R-2.....	207
S6.17	Additional Requirements for Repairs, Alterations, or Modifications.....	208
S6.17.1	Scope	208
S6.17.2	Repairs of Defects.....	208
S6.17.3	Modifications	208
S6.17.4	Drawings	208
S6.17.5	Authorization	208
S6.18	Examination and Test	208
S6.18.1	Methods.....	208
S6.19	Repairs, Alterations, or Modification Reports	209
Supplement 7 Repair and Alterations of Pressure Vessels in Liquefied Petroleum Gas Service		210
S7.1	Scope	210
S7.2	General and Administrative Requirements	210
S7.3	Welding	210
S7.4	Requirements for Repairs and Alterations	210
S7.5	Requirements for Change of Service from Above Ground to Underground Service.....	210
S7.6	Examination and Testing	210
S7.7	Certification/Documentation and Stamping	211
S7.8	Inspection	211
S7.9	Coatings	211
Supplement 8 Weld and Post Repair Inspection of Creep Strength Enhanced Ferritic Steel Pressure Equipment		212
S8.1	Scope	212
S8.2	Weld Repair of Grade 91 Steel	212
S8.2.1	Weld Repair Conditions	212
S8.2.2	Weld Repair Conditions for Dissimilar Metal Welds.....	213
S8.3	Application of Controlled Fill Welding Procedure	213
S8.4	Qualification of Controlled Fill Welding Procedure	217
S8.5	Post-Repair Inspection	218
Supplement 9 Repair and Alteration Forms and Instructions for Completing Forms		219
S9.1	Scope	219
S9.2	Form R-1, Report of Repair, NB-66	220
S9.3	Form R-2, Report of Alteration, NB-229	225
S9.4	Form R-3, Report of Parts Fabricated by Welding, NB-230	231
S9.5	Form R-4, Report Supplement Sheet, NB-231.....	236
S9.6	Form NR-1, Report of Repair/Replacement Activities for Nuclear Facilities, NB-81	238
S9.7	Form NVR-1, Report of Repair/Replacement Activities for Nuclear Pressure Relief Devices, NB-160	244
S9.8	Corrections to Completed National Board Report Forms.....	249

Section 7	NBIC Policy for Metrication	251
7.1	General	251
7.2	Equivalent Rationale	251
7.3	Procedure for Conversion	251

Section 11	Index	278

INTRODUCTION

It is the purpose of the *National Board Inspection Code* (NBIC) to maintain the integrity of pressure-retaining items by providing rules for post-construction activities including installation, and by providing rules for post-installation activities including inspections, repairs, and alterations, thereby ensuring the safety of the pressure-retaining items' continued use.

The NBIC is intended to provide rules, information, and guidance to manufacturers, jurisdictions, Inspectors, owner-users, installers, contractors, and other individuals and organizations performing or involved in post-construction activities, thereby encouraging the uniform administration of rules pertaining to pressure retaining items.

SCOPE

The NBIC recognizes four important areas of post-construction activities where information, understanding, and following specific requirements will promote public and personal safety. These areas include:

- Installation
- Inspection
- Repairs and Alterations
- Testing of Pressure Relief Devices

The NBIC provides rules, information, and guidance for post-construction activities, but does not provide details for all conditions involving pressure-retaining items. Where complete details are not provided in this Code, the Code user is advised to seek guidance from the applicable jurisdiction or other technical sources.

The words “shall,” “should,” and “may” are used throughout the NBIC and have the following intent:

- Shall – action that is mandatory.
- Should – indicates a preferred but not mandatory means to accomplish the requirement unless specified by other sources, such as the Jurisdiction.
- May – permissive, not required or a means to accomplish the specified task.

ORGANIZATION

The NBIC is organized into four parts to coincide with specific post-construction activities involving pressure-retaining items. Each part provides general and specific rules, information, and guidance within each applicable post-construction activity. Individual NBIC parts or other published standards may contain additional information or requirements needed to meet the rules of the NBIC. Each part provides specific references to direct the user where to find this additional information. NBIC parts are identified as:

- Part 1, Installation – This part provides requirements and guidance to ensure the proper installation and functioning of all types of pressure-retaining items. Installation includes meeting specific safety criteria for construction, materials, design, supports, safety devices, operation, testing, and maintenance.
- Part 2, Inspection – This part provides information and guidance needed to perform and document inspections for all types of pressure-retaining items. This part includes information on personnel safety, non-destructive examination, tests, failure mechanisms, types of pressure equipment, fitness for service, risk-based assessments, and performance-based standards.
- Part 3, Repairs and Alterations – This part provides requirements and guidance to perform, verify, and document acceptable repairs or alterations to pressure-retaining items regardless of code of construction. Alternative methods for examination, testing, heat treatment, etc., are provided when the original code of construction requirements cannot be met. Specific acceptable and proven repair methods are also provided.
- Part 4, Pressure Relief Devices – This part provides information and guidance to ensure pressure relief devices are installed properly, that inspections of pressure relief devices are performed and documented properly, and that repairs to pressure relief devices are performed, verified, and documented properly.

Each part of the NBIC is divided into major sections as outlined in the Table of Contents.
