Foreword

The Insulating Materials Section of the National Electrical Manufacturers Association represents the major manufacturers of industrial laminated plastics. It is an industry group that conducts activities of interest not only to customers and manufacturers, but also to the general public, that ultimately result in benefits in safety, economy, and convenience, through such programs as standardization, safety and engineering, statistics and marketing, and other projects of mutual interest.

Industrial laminates consist of fibrous materials such as cellulose paper, cotton, glass, or asbestos fabric; or a mat of random-laid glass or other fibers impregnated or coated with a thermosetting resin binder and laminated under pressure and high temperature into hard, solid products. These products have useful properties of high mechanical strength, good electrical insulating properties, and serviceability at elevated temperatures when used within the range of temperatures indicated in Table 4-1 of this publication.

The Insulating Materials Section has supported applied research and development at Johns Hopkins University, the University of Delaware, and the University of Cincinnati for the following reasons:

- a. The need for an unbiased source of professional quality work on test method development
- b. The testing of industry offerings of industrial laminates for the purpose of guiding NEMA standards for these products
- c. Special studies of technology related to industrial laminates

Much of the work at these university laboratories has been directed at obtaining data for industrial laminates under the special environmental and test conditions of the Underwriters Laboratories Inc. Representatives of UL have cooperated with these NEMA-sponsored laboratories through interlaboratory correlations of test methods, and, as in the case of the publication at hand, have developed Relative Temperature Indices of the laminates.

These efforts culminated in the publication of NEMA IM 6 in 1993; the standard was subsequently reaffirmed in 2005 and 2013. In 2022, the consensus body of the Insulating Materials Section agreed to review and revise this standard and published it as ANSI/NEMA IM 60001-2022.

Comments and suggested revisions should be sent to:

NEMA Technical and Industry Affairs Department
National Electrical Manufacturers Association
1300 North 17th Street, Suite 900
Rosslyn, VA 22009

This standard was developed by the NEMA Insulating Materials Section, which is composed of the following members:

First Name	Last Name	Organization
David	Allen	Iten Industries
James	Azzarello	Röchling Industrial Cleveland
Scott	Chiang	The Gund Company, Inc.
Max	Egan	Accurate Plastics
Sushil	Keswani	IDEAL Industries, Inc.
David	Stankes	3M
Stephen	Tuckwell	ELANTAS PDG, INC.
Roger	Wicks	DuPont

This standard was reviewed and approved by the NEMA IM Section—Standard Consensus Body, which is composed of the following voting members:

First Name	Last Name	Organization	Voting Status
Robert	Brown	Röchling Industrial Cleveland	Voting
Solomon	Chiang	The Gund Company, Inc.	Voting
Nicholas	Colapietro	UL Solutions	Voting
Max	Egan	Accurate Plastics	Alt. Voting
Nancy	Frost	Frosty's Zap Lab, LLC	Voting
Khaled	Masri	NEMA	Observer
Mike	Moran	The Gund Company, Inc.	Alt. Voting
Jennifer	Palmer	ELTEK International Laboratories	Alt. Voting
David	Stankes	3M	Voting
Joseph	Tedesco	Hitachi Energy USA Inc.	Voting
Stephen	Tuckwell	ELANTAS PDG, INC.	Alt. Voting
Edward	Van Vooren	ELTEK International Laboratories	Voting
Evanne	Wang	DuPont	Alt. Voting
Roger	Wicks	DuPont	Voting
Jim	Wilfong	Accurate Plastics	Voting
Mark	Winkeler	ELANTAS PDG, INC.	Voting
Alan	Yerges	Eaton	Voting

With the 2022 edition, because of a change in software used to publish this standard, page numbering and other formatting details might differ from the original I 6-1993 or the reaffirmations in 2005 and 2013.

Section 1 REFERENCED STANDARDS

The following publications form a part of this document to the extent specified herein. The applicable issue of publications shall be the issue in effect on the date of the purchase order. In the event of conflict between the text of this document and references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.
