

AEROSPACE INFORMATION REPORT	AIR1564™	REV. C
	Issued 1979-02 Revised 2005-11 Reaffirmed 2013-01 Stabilized 2022-08	
Superseding AIR1564B		
Cross Reference for Materials for Fluid Systems Components, Including Military and Federal Specifications and Their International Equivalents		

RATIONALE

This document has been determined to contain basic and stable technology which is not dynamic in nature.

STABILIZED NOTICE

This document has been declared "Stabilized" by the SAE G-3, Aerospace Couplings, Fittings, Hose, Tubing Assemblies Committee and will no longer be subjected to periodic reviews for currency. Users are responsible for verifying references and continued suitability of technical requirements. Newer technology may exist.

SAE International Standards Committee Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

1. SCOPE:

This SAE Aerospace Report (AIR) provides a cross reference for SAE material standards to other similar standards. The SAE Committee G-3 invites comments and recommendations for the addition of materials and information for inclusion into this informational report.

No attempt has been made to obtain samples of the materials or conduct physical and chemical analyses to determine if they are equivalent. Anyone using this AIR, therefore, is cautioned to verify for themselves the interchangeability of the specific materials.

Additional contributions of missing or supplemental data should be directed to SAE marked for the attention of Committee G-3.

2. DEFINITIONS:

AECMA	European Association of Aerospace Industries
AMS	Aerospace Material Specification
ANSI	American National Standards Institute
ASTM	American Society for Testing and Materials
BSI	British Standards Institute
FED SPEC	Federal Specification
INACTIVE PART	Indicates that material is no longer recommended for the application
ISO	International Organization for Standardization
MIL SPEC	Military Specification
UNS	Unified Numbering System for Metals and Alloys
